Correspondence

Fellow Citizens of Raymond:

That we may better co-operate in making our high school the creditable success we all desire it to be, I would respectfully suggest several aspects it might be profitable for us all to consider.

In the first place there exists some doubt in the minds of certain of our parents as to the meaning of the new unit system of grading in the high school. When we went to school if we failed in one subject we lost a whole year, often having to repeat subjects in which we were proficient. Today if a student makes 50% in any subject he has finished that subject and has one unit of credit towards his standing. Twenty-one units give a student grade 11 standing, and eight more give him grade 12 standing. Of the above 21 units six are given in the first year, seven in the second, and eight in the third. If a student in first year, then, fails in one subject only, he is not now considered a failure, but a 5/6 or 83% success. Consequently to determine the degree of success attained by a school we now take the number of units written and the number of units passed and so compute the results. For instance, in our high school this year in grade 9, 127 units were written, and 113 passed making a unit percentage success of 88.97.

Another question exercising some of our boys and girls is: Whether a high school education is really worth the effort it costs. Let us consider this matter. The more varied the knowledge we possess the greater is our equipment for meeting and mastering the diverse types of problems we meet. We cannot understand and nobody understands exactly how some of these subjects develop us. But the wisest people of our day feel sure that they do aid us.

To the boy or girl we must say: You do not and cannot know at your age just what you will want to do ten or twenty years hence. If you specialize now you place yourself in a sort of rut or groove. Ten years hence you may wish to go into law, teaching, medicine, or any one of a score of vocations. Do you know that grade 11 standing opens the door to each of these avenues? Do you know, moreover, that if you have intelligence and character enough to master grade 12 that you can master the difficulties of any of these lines of endeavor? Do you know, too, that mastering high school will give you added self respect and will kindle in you new ambitions, and fire you with new aspirations and faith, and so greatly increase your chances of success?

Here is another fact: Once you have your high school and normal course you are independent. You can "cash in" your knowledge, so to speak; you can work your way up; you are in a higher stratum of society socially and economically. You need not teach unless you choose. But if you do choose, you are free to do so, and you can earn enough to enable you to save and rise as high as you wish. At the same time you are just as able to enter any other vocation as you would be without high school standing.

I fear we criticize the curriculum too freely before our boys and girls. Everybody can find fault with the curriculum, but if it came to constructing one better suited to give the average student the very best possible all-round

training, the most of us would likely find ourselves in embarrassing difficulties. Meanwhile, it is there. The best representatives of Alberta's whole population after many days of earnest effort, have built it and given it to us. Now let's give it a chance. If we point out its weaknesses before our children how can they consider it of value? If they cannot consider it valuable how can they be interested in it? If they cannot be interested in it, how can they learn, stay in school, accomplish what we wish them to accomplish? Let us criticize the course as much as we please—in the proper place. But that place is not in the presence of those very children whom we wish to succeed in that course. Let us not defeat our own end!

Again, we allow our boys and girls to miss too much schooling at the beginning of the year. The results of this policy have been disastrous. The number of promising careers which, during the last ten years in Raymond, it has practically blighted is deplorable. Building mentality requires time just as the building of anything else. It cannot be done hastily and at the same time well. Our course of study is set so as to require ten months a year for four years, or forty months. And forty months it does require, not thirty-four. Too many think the boy can "catch up." He never does catch up. If he is unusually quick or industrious he may "patch up" and possibly pass, but he never does become fully interested and strong. Frequently he gets out of harmony with the teachers who, earnestly solicitous for his progress, urge him rigorously to greater effort. Lack of harmony results in his leaving school. Often, too, his efforts to "catch up" overdo his mind and produce a sort of intellectual stagnation or "indigestion" which renders suitable learning practically impossible. Often, again, promising boys are discouraged because of the apparent hopelessness of the tasks assigned when, if they had a chance, they would excel. Now I know what causes this thing—economic conditions. But if we stop to consider that our child's success or failure, contentment and satisfaction or bitter and despondent disappointment are the things we risk, as well as our own satisfaction and happiness, if we consider all these things, how long would that extra hundred dollars be an item worthy of respect? I have noticed, moreover that frequently the poorest children struggle along, attend school on stunted means, and pass. I could name enough of them during my experience in Raymond to prove my point conclusively. Let us struggle a little harder and give the boy his chance. It is but for four years. An eternity is at stake.

We have here the possibilities of a truly splendid high school. Considering the size of our public school we have reason to hope that within four years there will be 120 strong, capable students in high school. Of these, all going well, a most gratifying percentage will pass clear every year. We can accomplish this highly desirable thing by all pulling together and studying all the factors of efficiency. To that end we, your sincere servants, will earnestly strive.

Raymond High School Staff.
Per John H. Blackmore.

A shower in honor of Mrs. Glen Tolstrup (nee Ruth Sheppard) was held by girl friends last Wednesday at the home of Mrs. Geo. D. O'Brien. About 50 guests were present.

Roman Catholics To Build Church Here

According to unofficial information received yesterday by the Recorder, work will commence soon on the erection of a Roman Catholic church on lots south of the second ward chapel, which the new edifice will approximate in size. Tentative plans call for a seating capacity of 300, as this church is intended to serve the district as far west as Magrath and east to New Dayton, which embraces a Catholic population of about 500 when the numerous Hungarian emigrants are considered. One task the R. C. church has set itself is the Canadianization of local Hungarians, and for the benefit of these, special services in their native tongue will be held. It is expected that the new church will be completed in time for Christmas services. Plans for building were discussed last Sunday at a meeting held at the home of P. W. Cope. Among those present were Father Gross of Cal-

News Notes

Misses Gladys Card and Donna Leishman, both of Cardston, were guests at the home of Mrs. S. B. Card this week.

Mrs. T. J. O'Brien entertained last Thursday in honor of Mrs. Wood, mother of T. Geo. Wood, and Mrs. Yates, sister to Mrs. A. W. Kirkham, who are returning to Salt Lake City today.

Frank Low is here for a visit before returning to Salt Lake City with his family, who have been visiting Mrs. Low's mother, Mrs. Thos. Hicken. Miss Ora Hicken will accompany them. Mr. Low will continue his studies in medicine in Salt Lake.

Gary, and Mr. Collett, C. P. R. emigration officer. The latter predicts that in less than two years the majority of Hungarians now here will have been joined by their wives and families.

Why Many Homes Are Damp Inside

Builders agree that the dryness of a building depends largely on the insulating powers of its sheathing paper.

Hercules is the only building paper which offers 100 per cent. protection against winds and dampness. Its hard protective surface is obtained by using an exclusive coating preparation that is absolutely inviolate.

The reduced heating expenses more than offset the slight extra cost of Hercules.

There Isn't Time

Preparing for a brief holiday at a summer cottage on one of our lovely Western lakes, the writer of this column tossed a few old magazines in his grip wherewith to pass an idle hour while idling under the trees. Glancing through one of these his eye was caught by an article appearing under the heading which appears at the top of this column.

How often are people heard to exclaim, "I haven't time," or "There isn't time," uttered by way of excuse for not doing something which ought to be done. And how false and shallow such an excuse can be! The necessary time can always be found for the discharge of one's duties and obligations if the will to do is in evidence.

But on the other hand, it is perfectly true that "there isn't time" for many things upon which, nevertheless, countless people expend an enormous amount of valuable time, resulting in pure waste.

Time may appear long and slow of movement when measured by centuries and the history of nations, but it is fast and fleeting when gauged by the life of individuals. Men who have lived long and very active lives filled with noteworthy achievements have at the close of their careers expressed their regrets in the words, "So much to do, so little time."

Time, coupled with good health, is the most precious of gifts to mankind, because the span of human life is brief, every moment should be put to the best possible use. Sufficient of it should be devoted to healthful pursuits and invigorating exercise and recreation in order that the body may be kept strong and physically fit to keep the mind alert and active and the body capable of the work it may be called upon to do. Only so can the best use be made of all the time allotted to the individual.

But, let it be repeated and emphasized, there isn't time in even the longest life for some things. Sorrow comes to all at some time or other, but "there isn't time" to waste in brooding over one's sorrow and losses. To do so is to deny time to further shorten life.

There isn't time in this life for worry. Worry kills. It accomplishes nothing, but it is a deadly destructive and undermining. It is a light, proper and sane person sensible and prudent to take thought of and for the future, but waste people cannot think of this desirable trait with needless, senseless, worry. Worry is too busy to hunt for grief, for things among the flowers.

If we may be today by what friends or others say about us. We may be judged, our actions misrepresented, our words distorted. We may be laughed, slandered, and made the victims of false rumor. These things cut and hurt, but "there isn't time" to let them long annoy. Along with them, we must also make many things to make us happy and glad, and we need all the time there is for the bright and joyous things of life.

Life is too short for thoughts of malice, hatred and revenge. Wrongs may be inflicted upon us, but by pursuing the even tenor of our ways, the mouth of the slanderer will be closed and his evil words effectively answered. "Life isn't long, just time for song and love, and things sublime." Let not one moment with thoughts that burned. Good friends there isn't time.

People there are who are so busy in this life getting everything out of it which seems to them all important and worthwhile that they can find no time to think of and prepare for a future life in which we all believe, while there are others so absorbed with thoughts of that future life that they become negligent of the duties and responsibilities of this life and their obligations to others, and lead narrow, selfish lives in a continual atmosphere of gloom. Each are wrong. There isn't time for such misconceptions of the true meaning of life.

It would, for most of us, be time well spent if once in a while in the quiet of an evening hour we made a mental inventory of our days, and weeks, and months, and carefully classified under appropriate headings the use being made of the time allotted to us. Are we using this precious inheritance, which once neglected is immediately gone never to return, for the improvement of our minds, an increase in our talents and powers, and devoting all the best of which we are capable for the advancement of our age and race? Or are we wasting precious hours and days on matters and things for which, after all, nobody really has any time to spare?

Plans For British

Cruiser Disappear

Navy Has Been Keeping Details Of Armament Secret

Plans for the British cruiser *Suffolk* have been kept secret. The *Suffolk* is under construction at the Portsmouth navy yard and details of her armament have been one of the secrets of the navy. The disappearance of the *Suffolk* plans reveal that plans of the submarine K-2 recently were stolen.

It spoils the effect when a man gets angry during a religious argument.

Big Family Of Settlers

Family From Minnesota Settle in the Humboldt District

Mr. and Mrs. John A. Stundbeck, from Minnesota, have recently settled in the Humboldt district with nine children ranging in age from two to 19 years. They bought 960 acres of farm land in this district and came with several thousand dollars in cash and effects and farm equipment valued at \$5,000. They made the trip from their home in Minnesota in a motor car and motor truck on which was built a house large enough to hold the big family, which is the modern style of covered wagon or prairie schooner in which settlers of today make their migrations. In the old days the ox or mule-drawn covered wagon took days or weeks to cover long distances, whereas now the motor-driven prairie schooner makes the journeys in hours or days.

Has Radio-Equipped Car

The League of Nations assembly has a specially constructed radio-equipped Pullman car for emergency use. This car is to be used to take members to troubled areas in time of need.

Exports High

Exports from Canada to Australia rose in March to the exceptional value of \$2,198,752, of which about half was for automobiles and parts.

A tame elephant eats more than one thousand pounds of green fodder and twenty-five pounds of finished rice daily.

Minard's Liniment for Insect Bites

Take Over Elevators

Saskatchewan Wheat Pool the Greatest Wheat Handling Organization in the World

Elevators of the Saskatchewan Co-operative Elevator Company, Ltd., recently came under the management of Saskatchewan Wheat Pool, making the greatest wheat handling organization in the world.

The first payment of \$1,500,000 was made by the pool to the company by certified cheque. The pool previously had made a deposit of \$500,000 just prior to the meeting of the directors and shareholders of the company in April when decision to sell the company's elevators and holdings was reached.

The total amount to be paid for the elevator system of the Saskatchewan Co-operative Elevator Co., Ltd., by the Saskatchewan Wheat Pool Elevators, Ltd., is \$11,059,310.47 under the terms of the award handed down by a majority of the board of arbitrators.

Agony Of Lumbago Quickly Soothed Away By "Nerviline"

For the sharp, piercing pain of Lumbago, and the tormenting aches of Rheumatism, no liniment is so efficient, so quick to bring comfort and relief as good old "Nerviline." This wonderful liniment penetrates through the tissues very quickly, sinks at once to the core of the pain, draws the blood from the congested area, and thereby relieves the pain in a short time. Those who suffer from stiff joints, swellings and Rheumatic conditions should use Nerviline, the King of Pain Destroyers. Get Nerviline today, 35c, at all dealers.

Really a Language

The call of the cricket is really a language, it is said to have been proved by a recent experiment when a female cricket was made to call through a telephone, whereupon a male insect at the other end of the line became excited on hearing the note.

RETAIN YOUR VIGOR

This Can Only Be Done By Keeping the Blood Rich and Red

If you would retain your vigor and ambition, keep your blood and nerves in good condition. Anemia, or thin blood, lowers the vitality, starves the nerves and causes a general run-down condition. When the blood is thin the skin loses its color, the shoulders droop and weight is lost. The effects of anemia are loss of appetite, suffering from indigestion, headaches and sleeplessness, and it is nervous and exhausted after slight exertion. If you have any of these symptoms do not delay but begin treatment now with Dr. Williams' Pink Pills and you will be gratified with the prompt improvement in your condition. Among the thousands who have found new health through the use of this medicine is Mrs. Herbert Nagle, Ludlow, N.B., who says: "I had not been feeling well for some time and was gradually growing weaker. I would take dizzy spells and often faint. I was subject to severe headaches and found it hard to do my work. I took doctor's medicine for some time, but it did me no good, and I was still growing weaker. In this condition I began the use of Dr. Williams' Pink Pills and in a short time found they were helping me. I continued the use of the pills for a while longer, and found that the trouble that had bothered me was gone and I was once more a well woman."

Get Dr. Williams' Pink Pills at your druggist's or write The Dr. Williams' Medicine Co., Brockville, Ont., and the pills will be sent post paid at 50 cents a box.

Regina Building Permits

Building permits issued at Regina for the first half of 1926 amounted in value to \$1,728,619 as compared with \$907,466, for the corresponding period last year.

Several Chinese generals have issued edicts imposing the death penalty on any soldier found smoking opium.

For COLIC AND CRAMPS PAINS IN THE STOMACH There's Nothing Equals

It has been in use for over 80 years; its action is pleasant, rapid, reliable and effectual, and relief comes promptly.

"Don't accept a substitute." The genuine is put up only by The T. Milburn Co., Limited, Toronto, Ont.

Turkish Women Are Efficient

Great Work Being Done By Them In Constantinople

Illusions regarding women have been broken right and left during the last few years. The final blow, however, comes from Kathryn Newell Adams, president of the Constantinople Women's College.

Miss Adams, who was in the United States for the summer holidays said that Turkish women have an extremely active suffrage society, are clearing the streets of Constantinople from beggars, cleaning up the real tight districts in the city, actively campaigning for prohibition, organizing trade schools for children, using the mosques as community centres, organizing mothers' clubs, clinics, milk stations, child health centres, and managing homes where beggars who are found on the streets are taken and taught an honest trade. In other words, Turkish women are not the clinging vines, lacking all administrative ability and efficiency, that western nations have pictured them to be.

The Empire's Food Supply

Faced With Shortage Britain Would Have to Depend on Dominions

(Since) Great Britain can feed only two-fifths of its people from its own resources, it is fairly obvious that a world shortage in food would hit Great Britain first and hardest. Great Britain's hope of escape from the worst consequence could only be in the empire. Yet what measures have been taken to ensure that empire resources should be at her command in any such dire development? Australian and South African opportunities in beef are neglected in favor of foreign supplies. West Indian sugar has been victimized by foreign—and inferior—produce, and even Canadian wheat finds its way to the United States whilst the United States export to us—London United Empire.

Armless Artist Wins Honors

Work of Japanese Girl Sold For Large Sum

A Japanese girl, handicapped by the loss of both arms, but possessed of great courage, astonished Tokio art circles by carrying off the honors of the "Peonesses" School exhibition. Holding specially constructed brushes between her teeth, Miss Yumeko Yamaguchi, the armless artist, had for several years painted oil, the decorative sash worn by all Japanese women. Some of her work at the exhibit sold for as much as \$500. Miss Yamaguchi was to have been a geisha girl. After she had learned the samisen and graceful dances which pines the Japanese tired business man, one night her father suddenly became insane, killed her five brothers and sisters and cut off her arms.

England's Strongest Man

Blacksmith Bends Steels Bars and Easily Lifts Great Weights

J. C. Pile, of Gloucester, England, is known as "the strong man of the west." He bends a four-inch horseshoe nail double with his hands, and holding a bar of horseshoe steel in his teeth he takes one end in each hand and bends the bar into a loop. Recently he lifted 430 pounds of iron from the ground to his knee. Pile has been a blacksmith for 50 years. He is 43 years old. His height is 5 feet 10 inches and he weighs 221 pounds. He has a chest measurement of 50 inches.

It Bids Pain Begone.—When neuralgia racks the nerves or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

Rumania's Queen Economizes

Has Adopted Peasant Dress Excepting On State Occasions

Queen Marie of Rumania, in the interest of economy and serviceability, has adopted Rumanian peasant dress. Only at court ceremonies or elaborate state occasions does she wear European silks or satins. Even while riding in the streets of Bucharest she may be seen any day attired in the picturesque hand embroidered linen costume of the peasant woman, with designs worked in gold, red or blue thread, with a flowing kerchief wound around her head, a bright red and white hand-knotted apron, and red leather boots.

Wins Bucking Contest

A nineteen-year-old boy, Jack Cooper, of Calgary, riding a horse aptly named "Dynamite," won the Major Fred Brewster challenge trophy in the bucking horse contest of the first annual show of the Jasper Horsemen's Association held on the Henry House Plains in the Athabasca Valley.

Keep Minard's Liniment handy

Curses on thee, little pest Filthy fly, unwelcome guest!

NO need to tolerate a single fly in your house. Flit kills flies.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills all the insects—and does it quickly. Get a Flit can and sprayer today.

STANDARD OIL CO. (NEW JERSEY)

Distributed in Canada by Fred J. Whitlow & Co., Toronto.

Ultra-Violet Rays

Research Work Commenced on the Power of Invisible Rays to Produce Vitamines

The power of the invisible ultra-violet rays to produce different tints and degrees of brightness in different materials has been vividly illustrated to New York theatre audiences, because this power has been used for some of the most brilliant theatrical effects in recent years.

Costumes white or dull in color under ordinary light are made to blaze and gleam with many hues under ultra-violet rays.

These spectacles were based on the researches of Professor R. W. Wood, of Johns Hopkins University. By flooding the members of the Association for Advancement of Science with ultra-violet rays in 1921 he gave the first public exhibition of the odd effects since popularized on the stage.

Ultra-violet rays have since been used widely in deciphering palm-prints, or twice-written manuscripts.

In the last year research has been concentrated on the power of ultra-violet rays to produce vitamins. For Scalds and Burns.—Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pain arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinary's fee.

Fable For Dentists

"Doctor," said the patient to the dentist, "I haven't a single decent excuse to offer for neglect of my teeth. I have had plenty of time to spare to have them attended to, no sickness in my family or press of business to keep me away from your office, and no lack of money to pay for the work. The truth is, I am just a plain, miserable coward."—Life.

Observing Secrecy

Plan to Keep Anglo-American Liquor Agreement Secret

A controversy over publication of the new British-American rum agreement, just reached in London, is likely to develop in the United States if both governments persist in the present intention to keep the provisions secret.

Secretary of State Kellogg says that the agreement is neither a treaty nor a convention. If that construction is maintained the agreement would not have to go to the senate for ratification and therefore the senate would have no formal means of making the agreement public.

Sunburn.

Mix Minard's with sweet oil or cream and apply. Quick and permanent relief.

Where Men Are Barred

Brighton is the proud possessor of the first flats in all England built exclusively for women. The first block was dedicated by Lady Emmott. Each flat is self-contained, and the occupant may have children or a woman companion—but no husbands, or anything of the kind. The rent averages about \$1.75 a week.

Only the uninformed endure the agony of corns. The knowing ones apply Holloway's Corn Remover and get relief.

A bachelor says: "Before taking the leap through the wedding ring a man should be sure that the net of conjugal bliss is properly stretched on the other side."

Genuine

ASPIRIN

Colds Headache Neuritis Lumbago
Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monacellulose. Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

The Vast And Varied Agricultural Possibilities Offered To The Settler In Canada

Canadian settlers are drawn from nearly every country in the world, and so vast and varied are the agricultural possibilities in Canada with respect to soils and climate that every settler should have little trouble in finding employment best suited to his particular taste or education.

The accompanying map will give some idea of the extent and distribution of Canada's fruit, ranching, dairying, wheat and mixed farming lands as they are to be found today.

The gardener can grow apples, peaches, pears and small fruit in the Niagara district of Ontario, or apples and small fruit in the Annapolis basin of Nova Scotia, and a variety of fruits in the Okanagan, Kootenay or New

Western Canada finally captured the faith of the land seeker, when the delusions respecting its climate and fertility were definitely swept away, population and railways advanced more rapidly than they had ever before invaded a new country. In the period 1901-1921 the territory embraced by the present provinces of Alberta and Saskatchewan increased eightfold in population, and the occupied farm lands spread over some 85,000,000 acres.

But it is not to fruit, ranching, dairy or even wheat farming that the settler and farmer are now turning their attention, but to mixed farming. This is becoming more and more noticeable as the years go by and the country

Modern Ideas In Old Book

Early Work on Kindness to Animals Is Being Reprinted
A treatise entitled, "The Rights of Animals," prepared by Herman Daggett in 1791 as a thesis in tending the master's degree at Providence College, now Brown University, has just been reprinted by the American Society for the Prevention of Cruelty to Animals.

It was printed at Sag Harbor, Long Island, in 1792, and is said to be the first American work on humanitarianism ever published. Copies are so rare that it has remained unknown except to a few collectors. As an ethical treatise, the work is considered of such excellence that it has been reprinted for free distribution, according to the introduction by Edward P. Buffet, in the hope that the sympathies aroused by it may not be "limited to the readers' own pet animals," but may awaken humane efforts in another cause, the abolition of the steel trap.

Who's Who In Wheat

J. C. Mitchell, of Dahinda, Saskatchewan, Will Try Again For Premier Honors In Wheat

Based on a press report stating that J. C. Mitchell, of Dahinda, Saskatchewan, intended to try to win back the wheat crown at the International Show at Chicago, the New York Sun recently published the following editorial under the heading, "Who's Who In Wheat."

Montana supplied to the world its champion wheat grower last year, when L. P. Yates, of Fishkill in that state captured the title at the International Grain, Hay and Stock Show in the autumn in Chicago, but Canada does not intend to let the honor stay south of the international boundary if its farmers can drag it north. The Dominion now announces that J. C. Mitchell, of Dahinda, Saskatchewan, who has already been cock of the walk three times, will be a contestant this fall. Mr. Mitchell was not in the contest in 1925, but he will be on the shore of Lake Michigan this year.

This International competition was instituted fifteen years ago, and Canada has taken the blue ribbon thirteen times. Sapper Wheeler of Rosethorn, Saskatchewan, succeeded in finding top place five times. Nobody else touches Mr. Wheeler's record in this achievement.

Canada's hope this year has a typical pioneer's history. He came to America in 1906 from Manchester, England. He did not have any capital. He took up a quarter-section of land forty miles from the railway and went to work. Now he farms 800 acres and is asking the Canadian department of agriculture to register a new potato, he has developed which appears to be all that a spud can aspire to be. Today a railroad crosses the Mitchell farm and the homestead is a show place.

Mr. Mitchell has spent very little time telling other persons that there is no chance for a man today. He went out and made his chance. And he did not make it by hailing during the wheat seasons either.

Butter Awards At Regina

Inter-Provincial Blue Ribbon Competition At Regina Exhibition

The Motherwell trophy representing the inter-provincial blue ribbon in creamery butter awards at the Regina exhibition was won by the Crescent Creamery Company, of Brandon, Man., after this company had scored first place in the Manitoba section for the provincial sweepstakes, with Belmont Creamery in second place.

For the Motherwell trophy the Manitoba companies were in competition with Central Creamery, Calgary, who took the first prize, and Edmonton Fine Butter Company, second prize to the Alberta section, and in the Saskatchewan section, the Lloyd-Holstetter branch of the Saskatchewan Co-operative Creameries was first and the Regina branch of the same company, second.

C.N.R. Official Made Indian Chief
W. A. Kingland, general manager of western lines, Canadian National Railways, during the Saskatoon exhibition was made chief of two Indian tribes. Chief Whitecap, son of the famous refugee from the United States at the time of the Custer massacre, and Chief Charles Eagle Cree of Saskatchewan, performed the ceremony.

Doukhobors Would Go To Alberta

Question of Entrance Now Being Considered by Alberta Government

Whether or not Alberta wants more Doukhobor settlers is a question now being considered by the provincial government. The matter came up through the recent request of the Doukhobor Colonization Society for information as to the possibilities for settlement in the Peace River country and the likely attitude of the Alberta Government towards such a project. As announced at the time, there are said to be 5,000 of these people in Russia who are desirous of migrating to Western Canada.

The premier said careful investigation will be necessary.

Watkins. "I think Jackson must have been educated in Russia."

Watson. "What makes you think so?"

Watkins. "He's always talking about his little red schoolhouse."

Flapper. "Should I marry a man who lies to me?"

Fortuno Teller. "Lady, do you want to be an old maid?"

Dominion Land System Of Survey Has Proven To Be The Most Desirable In Every Way

The Cultivation Of Corn

Intensive Cultivation Seems Necessary To Assure Success

The following bulletin was prepared by Mr. C. D. Matthews, seed specialist of the Dominion experimental farm, Indian Head, at the request of the Saskatchewan Corn Growers' Association, with a view to especially assisting the beginner in order that he may secure the best possible results in maturing his corn crop.

The corn is doing well. We must keep it that way. This depends upon the grower. The grain crop is now depending on the weather. The corn crop demands cultivation.

Some of the common reasons for cultivating corn are to:

- Destroy weeds;
- Conserve moisture;
- Mix the soil constituents;
- Improve the physical condition of the soil;
- Germinate dormant weed seeds;
- Give the plants a loose soil in which the roots will grow better;
- Cover organic matter, and
- Control soil temperature.

The type of cultivator to be used will depend on the type available, but it must do the job well. The first cultivation which is done soon after the plants have emerged should be deep and fairly close to the plants. Subsequent cultivations should be shallower and not close to the plants. Four or five inches deep for the first cultivation and two to three for the others is a fair gauge. At least four cultivations are required. The less ridged the cultivation is the better.

If you have a variety which matures in your area, you will be anxious to secure seed. In this case thin the number of plants per hill to three, or, if in rows, thin the plants to a foot apart when young. A small area treated in this way will bring striking results. If you are feeding sheep corn a thick stand is better.

Cultivate your corn crop as often as you can before it gets too high to work in properly. Remember the biggest object in cultivating corn is to kill weeds.

Record Gold Output

Gold and Platinum Produced in Canada in Increasing Quantities

A record quantity of gold is being produced in Canada. Figures recently issued by the Canadian Government bureau of statistics show that in 1925 the output was 1,755,735 fine ounces worth \$35,880,826. This was an increase of 210,353 fine ounces over the 1925 production.

In 1925 Canada produced a total of 8,698 fine ounces of platinum worth \$4,028,192. Of other metals in the platinum group, palladium, rhodium, tellurium, etc., the Dominion's output that year was 8,288 fine ounces valued at \$448,969.

The bulk was mined in Ontario, which province produced 1,461,039 fine ounces. British Columbia was second with 249,227 ounces; the Yukon produced 17,817 ounces; Manitoba, 1,421 ounces; and Nova Scotia and Quebec, 1,609 ounces apiece.

The platinum, 8,692 ounces was derived from Canadian ores treated in British and United States refineries. Practically all of this came from copper-nickel ores in the Sudbury district.

Many Visited Livestock Train

Total Attendance Through Saskatchewan Was Over Eight Thousand

After a three weeks tour through Saskatchewan the livestock train flitted out by the department of agriculture returned to Regina. There was a total attendance at the various places visited by the train of over 8,000 visitors. Of the animals disposed of, the Shorthorn breed was most in demand, 25 Shorthorns being sold, together with four Polled Angus, four Red Polls, three Ayrshires, two Holsteins and one Hereford.

These sales completely cleared out the stock of pure-bred sires in the department of agriculture, with the exception of the Hereford bull which won the junior championship at the Regina spring show, and two Holstein sires. Twelve scrub bulls were bought by the livestock men in exchange for purebred stock.

Southern Alberta Sugar Beets

There are seven thousand acres cropped to sugar beets in Southern Alberta this year, a thousand acres more than last year. Early prospects are for a good crop.

"How did you catch such an awful cold?"

"I changed from horn-rimmed glasses to shades, you see."

Nowadays one hears of community settlements and the advantages of grouping settlers in such a way that they will get the most out of the amenities of modern civilization. But to carry the idea to its extreme so that the farms radiate from a central community has always brought forth objections on account of the difficulty of working land laid out in triangular shape or any other form departing from the square or rectangle. Even the rectangle is sometimes considered objectionable if the length greatly exceeds the breadth as the distance the farmer would have to travel to get to his work at the rear end of the farm would then be too great.

To trace the rectangular farm to its beginning carries us back to the days of the ancient Romans. It is recorded that the system of division of land by meridians and parallels was handed to the Romans by the Etruscans, the first people who really practiced agriculture in Italy. The division of land by these two lines had a religious and mythical foundation. The unit of square measure was the "jugum," which was approximately two eighths of an English acre. In subdividing the lands of a colony, squares of 200 "jugera" were often used. Each of these was called a "centuria" and was 2,000 feet square, or a little more than three-quarters of the size of the quarter-section farm unit of Western Canada. They were further divided into the individual holdings, which ranged from two to ten jugera or larger.

The rectangular system of survey based on meridians and parallels, with sections one mile square, and six mile square townships numbered in ranges, was first instituted in America in 1785 by act of the congress of the United States, providing for surveys of the public lands. The first surveys were in Ohio, where a principal meridian was established and at right angles thereto a base line from which the outlines of townships were projected. As the survey was extended, principal meridians and base lines were laid out in each state until at present there are over 20 meridians and almost as many base lines.

There has been a great deal of speculation as to who introduced this system of subdivision of land into America. One theory is that it was introduced by General Gage to report on a system of subdividing land for settlement in the vicinity of Fort Pitt. Thomas Hutchins was the surveyor who assisted General Bonquet, and was the first to actually apply the system when in 1785 he was delegated to take out public lands in the state of Ohio. Colonel Bonquet originated the rectangular system in America, then it may be said that the idea came directly from Italy, for although born in Switzerland, this officer served under the King of Sardinia in Italy before coming to this country.

No doubt one of the fundamental reasons for the adoption of the rectangular system in America was an account of the simplicity it offered to the description and registration of land. Where townships are laid out from meridians and base lines a definite geographic position is attached to each township whether it is surveyed today or in the future. The townships fit together with a few fractional parcels.

The rectangular system of survey by sections, townships and ranges, based on astronomical north-south and east-west lines was selected for the subdivision of Western Canada. This Dominion land system of survey has proved to be most economical for the purpose and is the most comprehensive uniform system of survey in the world. Under it about two hundred million acres of land have already been surveyed by the Topographical Survey, Department of the Interior. Plans of more than 7,000 townships have been printed—the official documents accepted in all courts as adequate descriptions of land. *Montreal Free Press.*

Cat Walks 65 Miles to Old Home

A 65 mile trip meant little to Tommy, a pet cat owned by Mr. and Mrs. Robert F. Birkel, who moved from Danville to Lewiston, Pa., several weeks ago. A few days after the family moved the cat disappeared, and when Birkel was in Danville he found the cat had returned to the former home and was being cared for by neighbors, awaiting his master's arrival.

Mussolini In Good Company

Jan Tondor, famous Dutch painter, is busy with a study of the central figure is St. Paul. Tondor says his work will "include the three figures who dominate the present time, St. Paul, St. Theresa and Mussolini."

MAP OF CANADA SHOWING AGRICULTURAL POSSIBILITIES

Westminster districts of the sunset province of British Columbia. The large wheat fields of the west development of commercial nut trees is a recent and successful development in Southern Ontario and British Columbia.

In the foothills of Alberta, in some of the British Columbia valleys and in Southern Saskatchewan there can be obtained some of the finest ranching districts to be found the world over. When His Royal Highness the Prince of Wales decided on ranching as a recreative hobby, it was in the Canadian western foothills that he made his choice.

The gaily shepherded can feed his flocks in the central parts of Nova Scotia, and in the grazing districts of Southern Saskatchewan, and Southern and Southwestern Alberta, as well as in the central highlands of British Columbia. Nearly every variety of sheep can be, and is being, raised on the pastures in Saskatchewan and Alberta, from the Karakul (Persian) lamb near Calgary through the Lincoln, Leicester, Cotswold, Shropshire, Oxford and Hampshire, to the finer wooled Dorset, Southdown and Merino. A small number of Scotch Black Faces, Suffolks, and Cheviots are also found throughout Canada, but their numbers are not increasing very materially.

The stronghold of the dairy farm has been Southern Ontario and Southern Quebec and rightly so, as these districts are suited to intensive farming and are near large markets and also shipping ports, where butter and cheese can be disposed of at remunerative prices. The prairie provinces are also making rapid strides in the production of butter, and their progress during the past few years has been nothing short of phenomenal. At a dairy show held in London, England, recently, an Edmonton dairy won the first prize in the salted butter class, and the second prize went to the Shual Lake (Manitoba) Creamery. In the unsalted class a Regina creamery won the premier award.

The fruit and dairy farms have, however, been vastly eclipsed by the fame of the western wheat fields. Perhaps no other natural product, whether of agricultural, forest, mineral or marine origin, has exercised such vitalizing influence upon the economic life of Canada in recent years. Wheat has been the most powerful factor in attracting population and capital to the Dominion, in bringing virgin areas under cultivation, in widening the market for domestic manufacturing, mining and other industries, in building up the volume and value of export trade, and in creating the purchasing power necessary to finance Canada's heavy imports of textiles, iron and steel, sugar, coal and other essentials which, for various reasons, are drawn wholly or largely from abroad. The statistics of yearly crops give but a faint picture of the manner in which wheat has impelled the material progress of Canada. When

Saskatchewan Seed Growers

J. F. Warren, Belbeck, Elected President At Annual Meeting

George Spence, former member for Maple Creek, and first president of the Saskatchewan Registered Seed Grain Growers' Association retired from the latter when the seed growers held their annual meeting. W. J. F. Warren, Belbeck, Sask., past vice president was elected president. M. P. Tullis, Saskatchewan field crops commissioner, was re-elected secretary and general manager, and W. J. Mantle was elected treasurer.

Members of the pool stated at the close of the meeting that a line feeling of co-operation had prevailed throughout the gathering and that they believed the success of the pool was assured.

Bees Like Sweet Clover

No Nectar Is Wasted From This Valuable Pasture

There is no doubt regarding the value of sweet clover as a bee pasture. When ensiling a crop of sweet clover at Weldwood Farm the field was literally covered with millions of honey bees, and they stayed with the fresh sheaves until the last of them went into the silo. The bees seemed to be doing their best to prevent the destruction of so much valuable nectar.—*Farmer's Advocate.*

Reducing Weight

One of the grave mistakes common to overweight persons is to decide suddenly that their superfluous flesh must be removed quickly. Reduction in weight should proceed slowly. It is impossible to maintain health on a drastic reducing programme. One cannot expect to take off in two months what it has taken years to put on and survive the experience in perfect health.—*Liberty.*

Saskatchewan Harvesters

Saskatchewan's gang of harvesters for the 1926 crop will number 35,000, it was announced by G. J. Tomsett, general superintendent of the clearing house, provincial government employment service.

Laughter is the sound a man hears when his hat blows off.

Derby Winners Strain for Canada

Twenty-five thoroughbreds coming from all parts of Great Britain and Ireland were unloaded from the Canadian Pacific liner Metagama in Montreal recently for dispatch to the Mullans breeding and training ranch near Winnipeg, where they went by fast freight later. Several of them were finely bred animals, counting winners of the English Derby and Grand National in their strain.

Interviewed at the wharf, A. Mullans, owner and shipper of the horses, said they had been collected all over England and Ireland, brought together at Dublin and thence sent to Southampton for shipment to Canada by the Metagama. They had, he said, come through the voyage in first-class condition and after a few weeks' training and acclimating, would be ready in some cases to race. Mr. Mullans has been in the thoroughbred raising in-

dustry for some five years past on his ranch near Winnipeg. The horses in this shipment are both steeplechasers and flat runners. They are for the most part three-year-olds and are all registered in the English stud book. They comprise one stallion, 16 mares and eight geldings.

Among them are included the following: Anania, three-year-old, by Ybro (own brother to Grand Parade, winner of the English Derby) out of Padua's Pride. Nellie's Pet, 3-year-old, by Cygnus (sire of winner of Scottish Derby last year) out of La Lils, a winner of races in England. Magberry, 3-year-old, also by Ybro, brother to Grand Parade. Master Michael, two-year-old, who breeds back to Troytown, a Grand National winner. Dentan, two-year-old, who comes of the same breeding as Coronach, winner of this year's English Derby.

WORLD HAPPENINGS
BRIEFLY TOLD

William Edwin Atkinson, A.R.C.A., the distinguished Canadian landscape painter, died recently in Toronto.

Canada's wheat crop for 1926 is estimated at 348,626,000 bushels. Last year it was 411,376,000 bushels.

One thousand and sixty-nine settlers entered Winnipeg recently on three trains. They came from the Old Country and the continent.

Commandant Franco announces that he will undertake his previously planned world flight next year, leaving Spain in April, accompanied by his wife and by Mechanic Rada.

Seven hundred persons died in New York city from poison liquor last year, said J. W. Quillen, chief chemist of the bureau of internal revenue, in issuing a warning against drinking bootleg whiskey.

Testimony at the trial of fifty men accused of treason in Angola has revealed that Turkey was forced into the world war by Enver Pasha, despite the wishes of a majority of the cabinet which stood against this step.

John Henry Meares, whose record for enduring the globe was beaten by Linton Wells and Edward S. Evans, will make another attempt to lower the record, according to reports. Meares leaves New York soon on his new attempt.

A statement made public by the department of immigration and colonization shows that there was an increase of 65 per cent. in immigration to Canada during the first five months of the calendar year 1926, compared with the same period a year ago.

Sheriff Colin Inkster, celebrated his 83rd birthday recently in Winnipeg, and received congratulations from all parts of Canada. "I think I should live to 100," he said. He has been sheriff more than 50 years and is the only surviving member of the legislative council of Manitoba.

Three passengers were killed when the basket dropped from a captive balloon at Kempton, near Bedford, Eng. The accident was caused by the gas bag breaking loose from its mooring, releasing the basket. Of the four passengers, only one escaped with his life.

Dr. Hon. John N. Morryman, M.P., one of South Africa's leading statesmen, died Aug. 3 in Cape Town. He was born in Somersetshire, England, in 1841, and went to South Africa in 1849. He was premier and treasurer of the South African Government in 1908-10.

States Are United
Against Russian Reds

British Have Completed Ring From Egypt to China

Following a conference of the chiefs of the secret services of all the British dominions, just concluded in London, the British colonial and India offices feel assured that with the exception of Turkey and Hindustan the whole southern part of Russia is encircled by a series of states determined to oppose attempts to spread red propaganda.

These states, it is announced, are united in a continuous, unbroken offensive from Egypt to India and China. It is further announced that Sir Charles Triggart, Calcutta police chief, has been appointed to head the propaganda section of Scotland Yard for the next five years.

In Egypt, the governor of Sudan, who is most friendly with the extremists, quit when he was faced with strong opposition and England now is prepared to withstand red propaganda there. In Hedjaz, Sultan Ibn Saud has turned down all offers from his northern neighbors. Mesopotamia is unwilling to tolerate any interference from the propagandists.

To Wipe Out Debt

Belgium Surrender's State Railways to Private Owners

Surrendering her state railways to private ownership in an effort to wipe out the national floating debt, Belgium, in peace as in war, is assuming the lead for sacrificers among the countries of continental Europe whose finances are in a precarious condition.

The holders of treasury bonds have been ordered by King Albert in his position as financial dictator to exchange them for preferred stock of the National Railroad Company, which has taken over the state railways.

No Hurry

Negro caller at hospital—"I came to see how mah brother Joe Brown was gettin' along."

Nurse—"Why he's getting along fine; he's convalescing now."

Negro—"Well, I'll just sit down and wait till he's through."

W. N. C. 1611

Canadian Show In New York

Canadian Mayors Invited to Visit N.Y. During Canadian Show

Following a meeting of the executive and general committee of the Canadian Exposition, held at the Hotel McAlpin headquarters in New York, Henry E. Coleman, executive chairman of the exposition, announced that plans had been made to bring the mayors of virtually every Canadian city to New York on a special train, for the exposition opening in January, 1927. Other detailed plans of the exposition, which will be housed in the Manhattan Opera House beginning Jan. 11, were made known also, following the meeting.

Arthur L. Lee, managing director of the McAlpin, who attended the meeting, stated that several doors of the hotel would be set aside to entertain the Canadian officials, and that a considerable part of the hotel would be given over to guests here for the big show. He will have special decorations, with the Maple Leaf of Canada predominating, and special entertainments have been arranged, one each in honor of every province of the Dominion.

Among the mayors expected to come here are: The Honorable Thomas Foster of Toronto; M. March of Montreal, and the chief executives of Quebec, Winnipeg, Vancouver, Ottawa, and other principal cities. It is planned to have their special train met by a delegation of city and state officials, and Mayor Walker will welcome the visitors. A special committee was sent to Canada within the week, by the exposition officers, and are now engaged in arranging various details from the Canadian end.

Already the search of "Miss Canada" has begun north of the Dominion line, and the young woman selected as the fairest in the Dominion will be entertained while in New York by the new "Miss America," who will be selected at the annual contest in Atlantic City.

Every form of Canadian activity will be displayed and will be represented by exhibits at the show.

Autumn Tournament At Jasper

Golf Week Organized For Sept. 11 to 18 at Canada's Largest National Playground

Announcement is made of the list of events to be held during the first annual autumn tournament on the Jasper Park Lodge Golf Links from Sept. 11 to 18 inclusive. Invitations are being extended by the committee in charge to all golf clubs on the continent and the interest shown in the tournament to date would indicate that it will be a really international competition. It is understood that the trophies and prizes will be unique and of such value that they will be highly prized by the winners.

In making entries, golfers are requested to give full name, club membership and address, and to send their entry as early as possible by post or telegraph to C. L. Weldon, assistant secretary of tournament committee, Jasper Park Lodge, Jasper, Alberta.

Other sports available at Jasper during golf week will include, tennis, swimming, riding, hiking, mountain climbing and motorizing, while arrangements can be made for fishing and hunting trips from the lodge to districts outside the park.

Making Yokohama Beautiful

Reconstruction After Great Earthquake Is Being Rapidly Completed

"Yokohama, Japan, will be a new city when the work of reconstruction after the great earthquake is completed," said Mr. Marshall Martin, a resident of that city who was in Canada enroute to Montreal thence to England. He will return to Japan this autumn. "The work of reconstruction is about one-third completed," he said, "and the work of surveying and planning is finished. Wider streets will be built, and modern buildings and facilities will make Yokohama one of the most delightful cities in the world."

To Salvage Camera

Equipment Lost In Lake As Result Of Aeroplane Wreck

Frank Stewardson, a Fort William diver, has been engaged by the Dominion forestry service to salvage the camera and other instruments which lie at the bottom of Kashiabowee Lake, as a result of the wreck of the aeroplane E-Y, July 22. The instruments are said to lie in 54 feet of water, and Mr. Stewardson is taking out his diver's suit and assistants. He has little doubt that he can descend to that depth and recover the lost articles. It is said that it would take several months to duplicate the lost camera.

Between eight and nine hundred languages and dialects are in use among the natives of Africa.

"IDEAL" Fashion
by J. Van Belle Threlkeld

The Charm of Soft Fabric

New frocks are soft and fluttery with flowered materials and flares. The frock presented here is sure to take the eye of the miss and little woman. First, because of its arresting simplicity of line, and second, because of the loveliness of its material. A wide ribbon sash is tied at the low waistline, where rippling skirt folds slender bodice. The lustrous neck is finished with a narrow binding of the same plain material as the flaring sleeves. No. 1254 is in sizes 16, 18 and 20 years. Size 18 years (36 bust) requires 4 1/2 yards 36-inch figured crepe, and 3/4 yard plain georgette crepe; ribbon for sash 2 1/2 yards 5 inches wide. Price 20 cents.

The secret of distinctive dress lies in good taste rather than a lavish expenditure of money. Every woman should want to make her own clothes, and the home dressmaker will find the designs illustrated in our new Fashion Book to be practical and simple, yet maintaining the spirit of the mode of the moment. Price of the book 10 cents the copy.

The Training Of Children

Valuable Work Being Carried On For Welfare of Children in Saskatchewan

Ten or twelve years ago two English ladies specially trained in Sunday School work came to Saskatchewan to see what they could do for the children of the prairies by giving them instruction in religion. After giving some years to this work in a restricted area they conceived the idea of carrying the Sunday School to the children widely scattered on the prairies and for this purpose a van was built and equipped, and since 1920 this van has been travelling about the southern part of the province of Saskatchewan, gathering children together and teaching them as far as possible something about the religion of our Lord Jesus Christ. This work was begun in 1920. Now, there are vans doing a similar work in all the prairie provinces and in British Columbia. The children so taught in the summer are enrolled as members of the Sunday School by post and so they are kept in touch with those truths which concern their moral and religious welfare.

But Miss Bosanquet was not content with this; she felt that something more should be done and so she gave the sum of \$15,000 to start a girls' school for the children of parents who wanted to give their children a religious as well as a secular education. The school was started in Regina in 1918 under the direction of the Sisters of St. John the Divine, a Canadian Order of the Church of England in Canada. The school has grown in numbers and a good sound education is given by very competent teachers to fit our girls to take their part in building up our country on a sound religious basis. The children are well cared for and every provision made for their happiness and well-being. The school is in the beautiful grounds of St. Chad's College and would well repay a visit by anyone interested in the welfare of children and their moral and religious training.

Well, Algy, I hear you have taken up walking as the doctor ordered. How does it go?

"Seems a bit awkward at first, without a windshield."

Insurance Agent: Don't you want your office furnishings insured against theft?

Doss: Yes, all except the clock. Everybody watches that.

The Canadian Legion

Charter of Incorporation Has Been Granted By Letters Patent

Letters patent incorporating "The Canadian Legion of the British Empire Service League" have been issued by the secretary of state, according to an announcement sent out by legion headquarters. Through the charter of incorporation the legion is empowered to "establish, organize and regulate provincial, district and local bodies or commands and branches, in convenient centres throughout Canada and elsewhere," and to establish parallel organizations to be known as ladies' auxiliaries.

The charter of incorporation gives legal effect to the work of the unfication that has been proceeding among Canadian veterans' organizations since the visit of Field Marshal Earl Haig, grand president of the British Empire Service League, to Canada last year.

The original intention of the legion was to seek a royal charter by special act of parliament, but the dissolution of parliament made it necessary to alter this proposal. Application then was made for a charter under the Companies Act.

To Exhibit At U. S. Fair

Alberta To Be Represented At Big State Fair At Sioux City, Iowa

Alberta is to be represented at one of the big state fairs across the line this year, arrangements being now under way for an extensive exhibit at Sioux City, Iowa, where the states of Iowa, South Dakota and Nebraska will hold their annual inter-state fair during the week beginning Sept. 19. The exhibit will be prepared at once, and will be made up of grains and grasses, both sheaf and threshed; coal, tar, sand and illustrative material. It will be shown in the government's own exhibition tent, a good location for which has been promised on the fair grounds.

Condensed Milk Absolutely Pure

Value of Condensed Milk As A Guardian of Health

The value of condensed milk as a guardian of health was eloquently demonstrated by an item in the London Daily Mail recently, one sentence in the article reading:

"The complete replacement of fresh milk by condensed milk has notably reduced tuberculosis."

The story had to do with the activities of the London Zoological Society and was reporting on the health of the animals. Many animals, especially those with cloven hooves, were liable to epidemics of bovine tuberculosis. The antelopes seemed to die of nothing else. Yet they lived under very good conditions and were given generous daily draughts of fresh milk. Then the fresh milk was put off and the thinned variety substituted. A marked improvement followed and tubercle has been stamped out in the antelope paddocks. The Borden Company Limited, who put up Eagle Brand condensed milk, have long advocated it as an infant food on the ground of its being absolutely pure as well as uniform. This incident would seem to bear out the statement that, save for mother's milk, there is no milk so safe for the infant as Eagle Brand.

East African Country
Has Evil Reputation

The fact that only five names figure upon the map of Lake Edward, in East Africa—isolated specks in the white blank of the unknown, testifies to its remoteness and evil reputation. The name of the country is Clangu, in which the natives of Bantoka are far famed as cannibals: The "Ba-Changu" file their teeth to a point. They are all on evil terms with their neighbors. Large tracts of country have been wholly depopulated by raids of cannibal peoples from the northwest Dark Forest game-tracks. Off the beaten track only a compass can save one. For over ten years the plains on the eastern and southern shores of Lake Edward have been closed and deserted by reason of sleeping sickness and the tsetse fly. In the plains are the little pools of Kikurel, unmarked in any map, with its islands of floating papyrus.

Memorial Tablet At Zeebrugge

To the gallant exploit of British sailors in 1918, a tablet on the Mole at Zeebrugge, was unveiled by Prince Charles, the second son of King Albert of Belgium. Mrs. Gibbs, mother of the commander who lost his life in the raid on the Mole, placed flowers beneath the tablet.

Linking Empire By Radio

The new beam radio transmitters connecting London with Canada and South Africa will be put in operation about May 1, according to reports received by the department of commerce. It is expected that the Australian and Indian circuits will be ready by July.

OUR CROSSWORD PUZZLE

Horizontal

- 1—Vehemence.
- 6—A marsh grass.
- 11—Endeavored earnestly.
- 12—Pertaining to the air.
- 14—A negative reply.
- 15—A pattern.
- 17—God of the midday sun.
- 18—A single unit.
- 20—A mineral called salt-peter.
- 21—Furthermore.
- 22—Having actual existence.
- 24—Strike gently.
- 25—To fasten up.
- 26—Sharp.
- 28—To fertilize (obs.).
- 29—To melt.
- 30—Medial rock.
- 31—To unite man and woman.
- 34—Indentation.
- 37—Alone in his class.
- 38—To stake.

Vertical

- 40—An assumed character.
- 41—Frigid.
- 42—The thigh bone.
- 43—A noisy disturbance.
- 45—Hush.
- 46—A small close fitting helmet.
- 48—Sedatum (abb.).
- 49—Drawing of a vessel through water.
- 51—Exultant.
- 53—To cook.
- 54—Any deliberate assembly.
- 1—Made reparations.
- 2—Railroad (abb.).
- 3—A minute mark.
- 4—A chamber to bake in.
- 5—To send in return.
- 6—A farinaceous meal.
- 7—To look into.
- 8—Skill.
- 9—A New England state (abb.).
- 10—Eternal or infernal.
- 11—To breathe through the nose.
- 13—A cup-shaped vessel with handle.
- 16—Principal divinity of ancient Memphis.
- 19—Arduous.
- 21—An apparatus for charging water.
- 23—Artful.
- 25—To have the flavor of.
- 27—Lacking moisture.
- 28—A human being.
- 31—Bump.
- 32—Fix firmly.
- 33—Half.
- 35—Confined.
- 36—Cut into shape with blows.
- 38—To harness.
- 39—Harmonious sounds.
- 42—Fahih, a form of oah.
- 43—Trust.
- 46—Cry of a sheep.
- 47—Reddish brown.
- 50—Grief.
- 52—Toward something.

SUNDAY SCHOOL LESSON

AUGUST 15

JETHRO'S WISE COUNSEL

Golden Text: To each one his work. Mark 13:34.

Lesson: Exodus 18:1-27.

Devotional Reading: Psalm 106:1-5.

Explanations and Comments

Jethro's Counsel, verses 13-22.—Jethro, Moses' father-in-law (called Reuel in Ex. 2:18), observed the way in which Moses' entire day was consumed in answering inquiries, settling disputes, making known God's laws. Matthew Henry reminds us that when a quarrel happened in Egypt and Moses would have reconciled the contending parties, they asked, "Who made thee a prince and a judge?" but now it was past dispute that God had made him one, and they humbly attended him whom they had then proudly rejected.

"What is this thing that thou doest to the people? Why dost thou thyself alone, and all the people stand about thee from morning unto even?" Jethro questioned, after he had watched Moses sitting in judgment.

"Because the people came to me to inquire of God," Moses answered. They regarded Moses as God's representative, prophet, or mouthpiece. When they had a matter in dispute, they came to Moses to settle it. "I judge between a man and his neighbor, and I make them know the statutes of God, and his laws," said Moses. "Statutes were definite rules, stereotyped and permanent. Laws were directions, or pronouncements, delivered as special circumstances required them" (Dr. S. R. Driver).

"The thing that thou dost is not good," said his father-in-law.

"There may be over-doing even in well-doing" (Matthew Henry).

Value Of Water Power

Rapid Development of Use of Water Power Has Effect on Coal Industry

One of the most important causes which contribute to the present serious situation in the colliery industry, is the rapid development of the use of water power. Little attention has been given to this means of power production, and, according to advice received by Bankers Trust Company of New York from its British Information Service, while in 1920 Europe was using 23,000,000 h.p. by the end of 1923 and today more than 35,000,000 h.p. are being used. This was necessitated by the fact that the world output of coal has remained stationary for the past three or four years at about 1,250,000,000 tons a year, while the demand for heat, light and power have been increasing steadily. Some of the advantages of water power are the very small wear and tear, maintenance and labor costs, and absence of dust, smoke, ashes and cinders.

Sidings Named

Sidings on the new Turtleford southeastern branch of the Canadian National Railways have been named as follows: Hartwell, Livelong, Fairholme, Galsyn, Robinhood, Medstead, Glenbush, Bournemouth and Rabbit Lake.

Answer to Last Week's Puzzle

Splendid Safety Record
On Canadian National

Congratulations From Workmen's Compensation Board of Manitoba

Sir Henry Thomson, president of the Canadian National Railways, is the recipient of a letter of congratulation from the commissioner of the Workmen's Compensation Board of Manitoba in which high praise is accorded the safety measures practiced by the company and its employees.

Chas. K. Newcombe, the commissioner, writes from the office of the board in Winnipeg to Sir Henry:

"We have just completed a check of accidents reported for six months ended June 30, 1926, and I wish to congratulate the Canadian National Railways upon the excellent showing made.

"The accidents reported to this office by the Canadian National Railways during the six months ending June 30, 1926, numbered 1,081, three of these being fatalities. During the corresponding period of 1925 this total was reduced to 872. During the six months ending June 30, 1926, 778 accidents were reported. This would seem to indicate a very gratifying state of affairs—especially as our records show an increasing accident frequency in all other classifications save one—and the Manitoba Compensation Board wishes to congratulate those in charge of safety work upon your system.

Italian Immigrants Arrive

Among a total of 576 third-class travellers who were landed at Quebec recently, off the steamship Ascania, was a party of 150 Italian immigrants, the largest single group of this nationality to be landed at Quebec this year. They will be employed on the land in Ontario, the prairie provinces and British Columbia. The remainder of the third-class passengers on the liner consisted largely of Poles, Hungarians and other central Europeans, all on their way to the western provinces.

"Now," said the master during the reading lesson, "can any of you tell me the meaning of 'divers' diseases?"

"Yes, sir," said Tommy, "divers' diseases is water on the brain."

Sutor.—I'm in love with your daughter, sir.

Her Dad.—What are your prospects?

Sutor.—Fine! She's accepted me

Hon. Mackenzie King Pays Tribute To Memory Of Late G. H. Boivin

Saskatoon.—"I have only this to say of Mr. Boivin, that he died as he lived, placing his life as a sacrifice on the altar of his country," said Right Hon. W. L. Mackenzie King in the course of a campaign meeting. "The Liberal leader dealt with the charges which had been made against the late minister of customs during the last parliament, referring to them as 'one of the most vicious attacks ever brought against the character of a public man.'" Mr. King quoted words of Mr. Boivin's defence in the house in June and reminded the people of Canada of their debt to men in public life.

Mr. King paused in the speech to say:

"I wish to discuss the national loss which our country has sustained today through the death of one of our ablest public servants. I refer to my old colleague, Mr. Boivin. I can scarcely trust myself to say very much of Mr. Boivin on this occasion. Word of his death came to me as it did to all his friends and colleagues, but I think you and the country would expect me to say a few words about one who was so widely known.

"Mr. Boivin was one of the young men in public life. He was first elected to the House of Commons in 1911, and was re-elected in 1917, 1921 and 1925. Although he did not belong to the same party as Sir Robert Borden, when it came to choosing a deputy speaker he asked Mr. Boivin if he would accept this office, and Mr. Boivin, with the chivalry characteristic of his rare, asked Sir Wilfrid Laurier if he should accept the position. Sir Wilfrid told him he should accept it, saying he was one of the few members who had a wide knowledge of parliamentary rules and procedure, and a thorough command of both languages.

"When I was called on to form a ministry, I asked Mr. Boivin to become minister of customs. My reason for asking him was that I knew there was an unfortunate condition in the department, a condition which required a minister who would give his time and attention to the most energetic way to the affairs. Mr. Boivin had been in for a year and as a consequence in part there was need for a minister who would take up the work in a most zealous way. Mr. Boivin accepted and took up the work with an order and zeal that has not been exceeded by a minister in any part of Canada."

Prince Addresses Scientists

Makes Presidential Address To Formidable Audience At Oxford

Oxford, Eng.—The Prince of Wales came back to the scenes of his student days and delivered an address before the famed British association—a formidable audience of gray heads made up of the most learned minds in the field of science in England.

The Prince, who was making his presidential address, is the first member of the royal family to be honored with this distinction since 1859, when his great-grandfather, Prince Consort Albert, held a similar post.

The Prince spoke on the relationship between science and the state. He indicated his belief that science is the key to prosperity and hinted that science might play the part of the world's industrial leader.

Bail Is Refused

Toronto.—With bonds as high as \$50,000 offered as bail for some of the sixteen under arrest in Ontario in connection with the deaths of alcoholic poisoning, the attorney-general's department is adamant in its refusal to allow bail to any of those concerned.

Government Takes Action In Effort Towards The Suppression Of Smuggling

Ottawa.—Action towards putting into effect the recommendations of the customs probe towards the re-organization of the department of customs is being continued. While no announcement of the contemplated changes is yet forthcoming, it is probable that a statement in the matter will be available within the next few days.

"Mounties" are now located. It is pointed out, at vulnerable points along the Canadian border. The placing of

Overseas League Gives Dinner To Willingdon

Canada's New Governor-General Assured of Hearty Welcome

London.—Viscount Willingdon, who will succeed Lord Byng as Governor-General of Canada in the fall, and Lady Willingdon, were guests of honor at a dinner given by the Overseas League at the Hotel Cecil. The dinner was attended by 250 delegates, chiefly women of Canadian universities now visiting England.

The chairman, Sir Campbell Stuart, Canadian-born director of The Times Publishing Company, assured Lord Willingdon his Canadian days would never be dull and that he would return to England at the end of his term, like all his predecessors, a good Canadian. Sir Campbell told the Canadian women present they were fortunate in their Governor-General's wife. The women of Canada, he said, offered Lord and Lady Willingdon a true Canadian welcome to their Canadian home.

Viscount Willingdon thanked the Canadian visitors for their kindly greetings and said he hoped they would return to Canada firmly convinced that the Mother Country was very much alive and a worthy mother of her great daughters growing to be great nations.

Meighen Denounces Liberals

Says Mr. King Trying to Hide the Welter of Wickedness

North Bay, Ont.—Standing at the "portal of the great north"—as he himself put it—Premier Meighen declared his readiness to cooperate with the Ontario Government in a practical plan to "get something done" in the development of Northern Ontario water power.

Mr. Meighen had a trenchant phrase for the accomplishments of the King administration. Liberals were waving flags and shouting hallo-lujahs "over reducing taxes, while the sales tax was two-thirds higher than when they took office. They want to get your blessing," he said, "for raising taxes on the masses of the people and reducing them on the rich."

"He described Mr. Mackenzie King as struggling desperately for some issue other than the customs report. 'There's no effort he won't make,' Mr. Meighen exclaimed, 'to hide the welter of wickedness.'"

Urges Closer Empire Unity

Premier of Australia Opposes International Independence of Dominions

Melbourne, Australia.—Speaking during the debate on the imperial conference agenda in the House of Representatives, Premier Stanley Bruce urged the need of greater imperial co-operation and sympathetic understanding of the aspirations of young nations.

He declared the adoption of international independence by the Dominions would mean disintegration of the empire, and added: "Australia will have no part in that."

Australia must aim, the premier said, at the closer linking up of the self-governing portions of the empire with as full a recognition of the independent status of each as is compatible with recognition of universal British nationality."

Quebec Candidates

Quebec.—Candidates in the federal election field at the present time in the province of Quebec are as follows: Liberals, 62; Conservatives, 8; Independents, 1.

King Speaks At Prince Albert

Addresses Large Gathering of Electors In His Own Constituency

Prince Albert.—Before an audience of 3,000 citizens of Prince Albert and district, Rt. Hon. W. L. Mackenzie King, Liberal chief of Canada and representative in parliament of this constituency, in an address here raised his audience to a high pitch of enthusiasm by stating that the story broadcasted by A. J. Doucet, Conservative member for Kent County, that Hon. Lapointe and other members of the King Government had been on a vicious "joy ride" in the steamer Margaret, had been proven to be without trace of truth. "The Conservative lawyers of Arthur Meighen have been compelled to publicly state that this story, told by Mr. Doucet in the presence of his leader, has not a shred of truth in it," said Mr. King. "Mr. Meighen was asked by Mr. Lapointe to deny it as Mr. Lapointe gave his word of honor there was no truth in it. You would have thought any man who had a sense of decency would accept the word of a member of parliament. Did Mr. Meighen do so? He did not. He is not capable of accepting the word of honor of a gentleman."

Russia Has Keen Competition

Will Have Some Trouble Exporting Grain This Year

Moscow.—Despite the prospect of an excellent harvest, says S. G. Brone, managing director of Russia's biggest state grain export corporation, the country will experience great difficulty in exporting grain this year because of the rivalry with the United States which, he adds, is already exporting its surplus.

Besides this, he continued, Rumania and Bulgaria had very good crops, a large part of which would be exported. Moreover, Poland, owing to lack of foreign currency, would be compelled to export rye in large quantities at low prices, thus competing with Russia.

Importing countries like Italy and France, he explained, would be obliged because of their financial positions to restrict their purchases sharply.

Honored At Welsh Ceremony

Duke and Duchess of York Members Of Gorsedd Order of Bards

Swansea.—A throng of 15,000 witnessed a notable ceremonial at the Welsh National Eisteddfod, in which the Duke and Duchess of York were initiated into the Gorsedd Order of Bards. The Duke, in his graceful manner, expressed gratitude for the privilege.

The Duke and Duchess, wearing green silk robes, entered at a trumpet blast. After being welcomed, they were invested with the flowing head dress of the order.

The Duchess also spoke briefly in English, and then added the Welsh equivalent for "Thank you very much."

All-England Team Say Good-bye

The seven weeks' tour of the English football team, who played 20 games across Canada and back, was brought to a successful conclusion when they boarded the Canadian Pacific liner Montroyal bound for their homeland.

The players all expressed their thanks for the hearty reception accorded them wherever they went and have left Canada greatly impressed, not only by the people, but by the country itself for its scenic beauty.

Reduction of the number of ports of entry, it is rumored, may shortly be brought about. This was one of the many phases of the investigation with which the committee dealt in its report.

Joe Smith, captain of the Bolton

Girl Conquers English Channel

Miss Gertrude Ederle Is First Woman To Perform Feat

Kingsdown, Eng.—Gertrude Ederle conquered the English Channel. The 19-year-old New York girl, swimming the grim waters in 14 hours and 21 minutes, thus became the first of her sex to accomplish the feat which has been performed by only five men before her. She left Cape Gris Nez at 7:00 o'clock and landed at Kingsdown, near Deal, at 9:40 o'clock.

Besides being the first woman to swim the Channel, Miss Ederle set a new record for the feat, the best previous time being made by Sebastian Traboschi of Italy, who swam from Calais to Dover on August 11 and 12, 1912, in sixteen hours and 23 minutes. Miss Ederle walked triumphantly up the beach between the little villages of Kingsdown and Walmer Castle, quite strong and fresh. The last few hundred yards of the swim were watched from the shore by thousands of visitors from all parts of the country. They had collected all available material to build a bonfire on the beach to guide the plucky girl as she neared her goal.

Thus she finished the feat in a blaze of lightening the coast for miles, as the accompanying tugs burned flares and displayed searchlights.

Source Of Poison Alcohol

Death Dealing Deception Shipped From New York Warehouse

Buffalo, N.Y.—Federal agents located a warehouse on the west side, in New York city, from which was shipped the poisonous alcohol which caused the death of nearly 50 persons in Western New York and Ontario. This information was contained in a telegram received from Frank J. Hale, federal supervisor of alcohol control, from William E. Dunn, Jr., and Joseph Spozza, members of his squad.

Chief Hale was informed that one man, a German citizen, had been arrested as an alleged member of the ring of distributors of poison liquor, which shipped 4,400 gallons to this city. The alcohol is believed to have been imported from Germany. The deaths resulted when the ordinary methods of rectifying denatured alcohol failed to succeed with the German alcohol.

Stolen Roman Coins Returned

London.—Twenty of the 21 ancient Roman Imperial gold coins, stolen recently from the Victoria and Albert Museum, have been returned to the curator of the institution by the person who purchased them, not knowing they had been stolen. No arrests have been made. The coins are from 1,700 to 2,500 years old.

League Opens Deliberations

Geneva.—The committee of experts, appointed by the League of Nations Council to study the question of the education of young people in the aims and ideals of the League of Nations, has opened its deliberations.

Alarming Conditions In Russia Over Split In Leaders Of Soviet Party

Protests Anglo-Italian Pact

Government of Abyssinia Appeals To League of Nations

London.—The British Government is gravely embarrassed by the public appeal to the League of Nations by Ras Tafari, Regent of Abyssinia, against the Anglo-Italian treaty, concluded without the knowledge of Abyssinia, by which Great Britain gives away "exclusive economic influence" in the west of Abyssinia to Italy in return for Italy's undertaking to support the British claim to control of the waters of Lake Tassara in connection with her plans for the irrigation of the Suddan.

All member states of the league are receiving from Abyssinia copies of the notes sent to Abyssinia by London and Rome, together with a note stating that such claims and methods constitutes a pressure incompatible with Abyssinian independence and membership in the League of Nations.

The Abyssinian regent asks the member states for their opinion on the British Italian deal.

Commander Kenworthy will ask Foreign Secretary Sir Austen Chamberlain in the House of Commons whether the government proposes to permit parliament to debate the subject.

Postpone Conference On Child Welfare

Date Scheduled Came In Week Of Federal Election

Ottawa.—The sixth annual Canadian conference on child welfare, which was scheduled for Vancouver, B.C., September 13, 14, 15 and 16, has been postponed on decision of the executive members and the British Columbia committee on arrangements. It was not desired to hold the sessions during the week of the federal elections, and efforts to convene the conference the following week had to be abandoned when it was found impossible to transfer some of the most important speakers, including Sir Henry Gwynne, of London, England, to a later date.

The conference has therefore been indefinitely postponed, but the committee secretary, Miss Charlotte Whitt, of Ottawa, will leave for the west early in October to arrange for the holding of the sessions on a later date. The annual meeting of the child welfare council will be held in Ottawa during October.

Another Gold Find In Ontario

Among Most Important In Recent Years Is Report

Toronto.—A spectacular discovery in the vicinity of Narrows Lake, some 20 to 25 miles northeast of Red Lake, in the district of Patricia, is reported by Jack Lindsay, who has just come out from that district showing samples of free gold, and which are stated to render the find among the most important discoveries made in recent years.

Mr. Lindsay is at present in Toronto. The discovery was struck by Tom Bathurst, Ont., wa.

The news of the discovery has been followed by a rush of men from Red Lake and Red Lake during the last few days.

Thinks India Should Have Gold Standard

But Royal Commission Would Not Put Gold In Circulation

London.—The royal commission appointed last year to examine Indian currency and exchange has issued a report advising a new gold standard by linking the existing currency with gold in a proportionally visible manner, but without putting gold into circulation. It is claimed by the commission that its proposals open the door for the introduction of gold currency some time in the future, but it stresses that when the time comes India may no longer wish for a gold currency.

Recent dispatches from Moscow and elsewhere have indicated a serious split among the Communist leaders and a struggle for power. Joseph V. Stalin, who has risen to power since the death of Lenin and has gradually ousted Trotsky, Kamenev, Zinovieff, and other old leaders from their places on the all-powerful political bureau, and from control of important bureaus, has finally aroused open opposition.

Trotsky's position has not been made clear, but the Stalin party believes he is organizing the opposition, which includes many of the most powerful men in the Lenin regime. While Stalin has control of the army and navy commands, there have been many indications that a large part of these forces are still under the influence of Trotsky and Zinovieff.

U. S. and the League

Lloyd George Says League of Nations Cannot Function Properly Without United States

Swansea, Eng.—David Lloyd George, former British premier, does not believe that the League of Nations will be made the power in the world. It should be built in some form or another, on her own conditions and in her own way, the United States comes in.

Mr. Lloyd George gave his view on the league in a talk at a reception given by the Welsh League of Nations organization to overseas visitors to the Welsh national Eisteddfod. He expressed the fervent hope that the United States would find her way clear to join the league, adding: "America alone, given God's guidance, can save the world from horrors."

Hon. Ernest Lapointe And Hon. Jacques Bureau Are Cleared Of Any Charges

Quebec, Hon. Ernest Lapointe, O'Connor and myself have taken into former minister of justice, and Hon. Jacques Bureau, former minister of the Margaret have been examined, customs, were declared innocent of I wish to declare publicly and categorically that no incident occurred during the "joy ride" on board the customs steamer Margaret, at a special inquiry opened here before Sir Francis Lemieux. R. L. Calder, government counsel, and W. F. O'Connor, as solicited with him, and also Inspector Walter Duncanson, who probed Montreal customs conditions for the late government, gave the exonerated. There only remains to be produced the log book of the Margaret which, through a misunderstanding on the part of Mr. Calder, is in Ottawa. An interim report will be made by Sir Francis.

"After having examined all documents and after Mr. Duncanson, Mr.

Where To Seed Fall Rye

By E. S. Hopkins, Dominion Field Husbandman

As summerfallow land is usually seeded to wheat, it is difficult to decide where fall rye should be seeded. Wheat is a more valuable crop than rye and it is advisable to seed it on the best prepared and cleanest land. During the last five years the average price of rye in the three prairie provinces has been 47 cents per bushel, while wheat has averaged 93 cents per bushel, or 39 per cent higher.

The yield of wheat, moreover, under most conditions, is fully as large as the yield of fall rye. It is obvious, therefore, that fall rye should be grown only where, for some special reason, it is not advisable to seed wheat.

Fall rye is most commonly grown in light, sandy soil which is too poor to produce good crops of wheat. While not producing its best yields under such adverse conditions, fall rye will give fairly satisfactory results, probably better results than will any other crop. Under extremely dry conditions, fall rye may give some what better results than wheat. Where the soil is liable to drift, fall rye has been found to prevent this, possibly very effectively on account of covering the ground during the months when drifting is liable to occur. Fall rye is very little troubled by cutworms, is not attacked by rust, and, on account of ripening early, is not exposed to the autumn frosts. Owing to its early growth in the spring it holds weeds or chaff fairly satisfactorily, and, because it is harvested early, some weeds, like wild oats, do not become mature and shed their seed before being cut. As fall rye is seeded and harvested at a different time of the year than is wheat, it enables a better distribution of labor throughout the season. In addition to being grown for grain, fall rye is used very extensively for pasture and in a number of other ways.

Experiments have been conducted at several of the Dominion experimental farms to learn in what place in the rotation fall rye should be seeded. It usually gives best results, of course, on summerfallow, but as wheat is preferred on this land it is hard to know on what other land it may be seeded. In some parts of the prairie, fall rye may be seeded on ground where stubble after the wheat crop has been removed. On the experimental farms at Morden, Manitoba, and at Indian Head, Saskatchewan, its large yields have been secured during the last two years, on ill-dressed summerfallow as on summerfallow land. While such favorable results may be continued in subsequent years, the ill-dressed wheat stubble, nevertheless, constituting the economy of the method of soil preparation, it is now regarded as the best way in those districts to seed fall rye. However, in some parts it has not been seeded with the best results. At Swift Current, Saskatchewan, this method of seeding has produced the only satisfactory results, other than seeding fall rye on summerfallow or to seed it between the rows of corn or sunflowers in the time of the last cultivation. Both of these methods have given yields, during the last two years, practically as large as where the fall rye was seeded on summerfallow and, of course, as much less cost. On land which is thought to be more suitable to rye than to wheat, the only practical method in this district, probably, is the seeding of fall rye after fall rye, possibly in a three year rotation of summerfallow, fall rye, and fall rye, or in some similar type of rotation. When fall rye was seeded in the spring with a crop of green feed, with a spring seeded grain crop, or when the grain crop was four inches high, the crop of rye was not satisfactory. Such seedlings appear to be too early for the fall rye and, in some cases, to injure the crop in which they are seeded.

When grown for grain, fall rye should be seeded at the rate of one bushel per acre, gone thus during the first two weeks of September. If possible, it is advisable to seed the rye when the soil conditions are reasonably moist because if seeded in extremely dry soil, the germination may be poor and the stand patchy. When grown for pasture or for hay, the rye may be planted earlier in the season and the rate of seeding somewhat increased. It is advisable to use seed which has been produced in Western Canada because it is less liable to winter-kill. The varieties of fall rye known as "Saskatchewan" and "North Dakota 938" have given very satisfactory results. Spring rye does not yield as much per acre as fall rye, and is not as productive as the common spring seeded cereals. Seed which has been kept stored in a dry bin for one year is less liable to be affected by ergot of rye than newly threshed seed. Fall rye is probably preferable

as a pasture than as a hay crop but, if used for hay, it should be cut just as soon as it heads. When used for grain, fall rye should be cut before it becomes dead ripe, in order to avoid shelling and subsequent volunteering in the succeeding crop.

Farmer Must Have Foresight

To Be Successful Sound Judgment Is Needed

The farmer must be something more than a healthy man and a worker. He must be a man of foresight and a man of sound judgment. In the city it is possible to makeshift for a living, although deprived of these qualities because the employer can do the thinking for his employees. In the rural districts it is otherwise.

Every landowner depends for his success as much upon his judgment and provision as upon his manual labor. Farming has become more of a science than a trade, and a very extensive science. It is true that governments taking account of the situation have set up many schools and experimental establishments which can undertake research that individuals would find impossible to undertake themselves.

But it still remains true that intelligence to understand the importance of these researches, to follow them up, and enough judgment to fit the service thus rendered them to their own particular problems. As a result, farming operations properly conducted demand a variety of qualities only met with in the choicest people. L'Action Catholique, Quebec.

Not A Hymn Of Hate

The Star Spangled Banner Song By Nation Whose Best Friend Is Britain

"The Star Spangled Banner" was unquestionably put down on paper while its composer was laboring under excitement incident to viewing an act of war by Great Britain against the United States. But it is no hymn of hate except in the minds of people with vivid imaginations, and the very fact that it has endured until now and is sung freely by a nation whose best friend internationally is Britain, is conclusive evidence that it is not. Besides this, the original inspiration of the song is, in all of its aspects, now a matter so remote that the whole poem has taken on a broad aspect without any vital connection with the event, and the British themselves will probably be greatly astonished to learn that anybody in this country harbors a contrary idea. Detroit Free Press.

Equipped Cathedral With Lightning Rods

Benjamin Franklin Installed System On St. Paul's In 1770

Now lightning rods are being installed on St. Paul's Cathedral which Benjamin Franklin originally equipped with lightning conductors. In 1770, he was in England negotiating in connection with the difficulties Great Britain was having with her American colonies, and at this time helped to install the conductors. The original rods on the famous cathedral were iron, and engineers who are now adjusting copper rods leave a fragment of the original iron conductor which he devised.

Something To Think About

Many People Speculate On How They Would Spend A Million

Sometimes the coming of unexpected riches has its pathetic aspect. An aged woman near Cleveland recently fell heir to half a million dollars and her first expenditure is to be for needed aid to save her husband's failing eyesight. What would you do with your million—what would be your first outlay? What is the thing you have always wanted and have always had to deny yourself? It isn't a useless speculation to wonder far from it.—Detroit News.

There are all sorts of ways of putting things, and some sound much better than others. For example, there is the case of the man of whom Lord Coleridge used to tell, whose father was hanged for highway robbery. Someone asked him how his father died.

"Sir," said he, "he fell from a scaffold outside Newgate while he was talking to a clergyman."

A Paris Tragedy

A tragedy in two acts is reported in a Paris paper:

"I am going to cut off my hair," said the wife of a street car conductor at Lyons, France.

"If you cut off your hair I will cut off my head," threatened the husband. She did.—New York Times.

Instructor: "Define millennium." Bright Student: "A millennium is something like a centennial only it has more legs."

Must Reduce Buffalo Herd

National Herd At Wainwright Increasing Very Rapidly

Despite the fact that 2,000 buffalo are being shipped to the wood bison range in the vicinity of Fort Smith this summer, the growth of the national herd in Buffalo Park, Wainwright, Alta., has been so rapid that the government has been forced to seek other means of reducing the herd to proportions that are within the grazing capacity of the park. It has been decided to dispose of an additional 2,000 animals on the hoof, by tender, the understanding being that any animals so purchased will be slaughtered and the meat and hides disposed of by sales on the public markets.

Last summer 1,634 buffalo were successfully transported to the northern range in the North West Territories, but this depletion of the herd was offset by the annual increase.

To Find Out How

British Commission to Investigate U. S. Prosperity

American prosperity intrigues the Briton to the extent that he wants to know how it is done. It is announced that the government is sending another small commission made up of representatives of employers and workers to the United States in September to study industrial relationships.

The House of Commons will make the appointments for the commission, which may be accompanied by several government experts.

Lacked Necessary Courage

Business Man Envied Workmen But Not Willing to Change Jobs

A tired business man passed a gang of laborers seated along the curb and backed up against the buildings in Bagley Avenue denouncing their noon lunches. As he watched huge sandwiches disappear, washed down with cups of milk and coffee from thermos bottles, he sighed: "I'd give a lot for how have, but I'd never have sufficient courage to trade jobs long enough to cultivate it."—Detroit News.

A girl ain't necessarily a peach because she has a stony heart.

An Aid To Horticulture

Experiments Show Plants Progress Rapidly Under Artificial Light

Experiments in the use of intensive illumination as an aid to horticulture were made recently with 1,000-watt gas-filled lamps equipped with large reflectors. In every case the progress of the plants was remarkable, says a writer.

The plants were placed under the light when buds were just beginning to form. Daffodils and Lent lilies, when placed under the light for six hours a night, flowered in four days, growing about an inch a day.

The rapid progress of vegetation in the Arctic regions, once the sun has reached a fair altitude, has already been noticed by travellers. This is most likely due to the fact that daylight is continuous, although the presence of an unusually high ultra violet content is probably an influential factor.

The same explanation may account for the rapid growth of wheat in regions where the whole process of sowing to harvesting has to be completed in five months.

Destroying Japanese Shrines

Primitive Forms of Superstitious Worship Are Dying Out

The shrines bureau of the home department has ordered the destruction of thousands of small shrines throughout Japan dedicated to the primitive superstitious worship of foxes, snakes and other animals.

These small shrines came down from times when animal worship and various forms of nature worship were part of the lives of the simple country people, and are doomed now on the ground that they are antagonistic to the progress of the nation.

Little opposition to the move is expected, because with the spread of education the more primitive forms of worship are dying out.

Willie: "Maw, that wasn't a painless dentist."

Ma: "Why, did he hurt you very much?"

Willie: "Oh, no, but he yelled when I bit his finger."

Feeding Growing Calves

Experiments Tried With Three Different Preparations

Barley has been found not a satisfactory substitute for corn in a calf meal. At Scott, Sask., Dominion experimental station an experiment was tried with three different calf meals to ascertain which was the best for growing calves. Nine calves as nearly as possible equal in age and weight were divided into three lots. The first lot received the commercial calf meal known as Royal Purple, the second lot a home meal prepared at the central farm in Ottawa consisting of finely ground oats two parts, cornmeal two parts, and ground flax seed one part, and the third lot the same except that the meal was prepared at the Scott station and that the corn was replaced by finely ground barley. The calves were taken from the cows when only a few hours old and were fed whole milk for two weeks, when the gradual substitution of skim-milk was commenced. In each case the meal was steeped in hot water before being added to the milk. The concentrates fed in addition to the milk and calf meal comprised whole oats two parts, bran three parts, oil cake meal one part. The experiment lasted 119 days.

In his report for 1925, Mr. Victor Matthews, superintendent at the station, supplies a tabulated statement of the results, from which he deduces that while the greatest gains followed from Royal Purple, the Ottawa prepared meal produced 100 pounds gain at less cost and that the Scott prepared meal, while cheapest, the gains were less and the calves were not thrifty. The Ottawa meal possesses the additional advantage of being easily prepared.

Farmers Buy More Land

Several resident farmers have purchased 23 quarter sections (3,650 acres) of land near Spirit River, Alta., in the past three months at an average price of \$15 an acre. These purchases are taken as evidence that the farmers have confidence in the district.

A Good Mouthful

"Adolf, give me some money for a new evening dress."

"Where is the one you had?"

"A moth ate it!"

Sheep In The West

Six Breeds of Sheep Under Experiment In Alberta

With sheep in quantities being shipped from Ontario to Kentucky, and Canadian lambs in demand by epicures across the line, it is surely an apt and appropriate time for the Dominion experimental farms to publish Bulletin No. 68 on sheep raising. It is true the publication is intended mainly for consumption in Central Alberta, but there is much in it that sheep breeders throughout the country will find of interest. The full title is "Sheep Raising in Central Alberta and a Comparison of Six Breeds." Grading up from common range ewes by the different breeds is the main theme, in the treatment of which the authors, Messrs. F. H. Reed and L. T. Chapman, of the Lacombe, Alta., experimental station, supply valuable data secured from experiments conducted from 1917 to 1925. The breeds of the shires used in the test were Shropshire, Oxford, Hampshire, Cheviot and Corriedale, each succeeding generation of ewes being bred to a pure-bred ram of the same breed as its sire. Some of the main points brought out are set down in the bulletin as follows:

The Cheviots made the most progress in grading up, the Shropshires being the first of the three Down breeds; the Leicester had the highest lambing percentage, but the lowest grade of wool; the Hampshire had the heaviest lambs when coming off range and also when finished, but the Corriedale and Oxford led in dressing percentage; lambs are more profitable feeders than yearling wethers; the Shropshire leads in quality of wool; oats are the best single grain for sheep; screenings and oat chop mixed give good results; prairie wool (a fine native grass) is the best roughage for fattening lambs or wethers; of the feeds grown in the long grass country cut oat green feed ranked first with slough hay second; it is more profitable to market lambs at the central stockyards, providing the feeder has a carload, than to sell to local drovers; greater profits can be made by marketing wool through the Canadian Co-operative Wool Growers Limited; flush the ewes before breeding; use potassium iodide in some form to prevent goitre; castrate all males intended for market lambs when 10 days or two weeks old, also dock all lambs at the same time; dip the entire flock at least once each year; supply the flock liberally with salt and good water.

Case Of Fifty-Fifty

Men Lose Head During Fire Same As Women

A man is just as likely to lose his head during a fire as a woman, but he doesn't carry as much trouble, according to Mrs. Chief J. H. Carllie, of Vancouver.

"It's about 50-50 between men and women," he said, "I know of cases where husbands have broken down while the wife is methodically going about the business of saving the valuable effects."

"Only recently we had a fire in the West End of Vancouver and all the man of the household would do was run around with an empty rail sent the. On another occasion the husband was found after the house was practically burned to the ground. With his head in his hands he moaned: 'By golly, I forgot the wife. She's in there.' Of course she was quillo safe. She had kept her nerve and had worked hard to save the family belongings, until the danger became too great."

"On the other hand, it's often the woman of the family that breaks down. When a woman loses her head during a fire she usually goes into hysterics, and that is a nuisance, while a man usually confines himself to running around and swearing. So long as he doesn't get in the way, he's not objectionable."

Barber Is Town Historian

Missouri Shop Keeps Diary Of Events Each Day

The barber shop of Dugby and Mayo, Huntville, Missouri, is the home of the city's archives. Here in a huge diary, resting on a centre table, are chronicled each day's events.

The "barber shop book" ends all disputes. When customers get to arguing about the coldest or hottest days the book is opened and there is found the truth in black and white.

It's no use to try to sell your five-year-old used car as a two-year-old because the book will find you out.

She (who has just refused him).—You don't seem very upset!

He (alirily).—Oh, dear no; that was only a rehearsal. I'm trying my luck with one of the Göttrix girls later on!

Fed.—"Mary says she intends to keep her youth."

Millicent.—"I know. She never introduces him to anyone."

Trail Riders Hold Pow-Wow

Picnigan Valley, situated in the Canadian Rockies north of Lake Louise is not altogether isolated as is apparent by the fact that the Trail Riders held their third annual Pow-Wow there. The valley was invaded by several hundred people all on horseback, and the deep silence usually surrounding the spot was broken by laughter and song.

The Pow-Wow was bigger and better than those of previous years. At noon on August 1, two separate parties of the organization met and amid cheers and hearty greetings pitched their tents, then as the evening clouds slowly covered the sky, the official opening ceremony commenced with the lighting of a huge bonfire, after which the whole three hundred Trail Riders

joined in community singing with a complete set of new songs specially prepared for this year.

The grand Pow-Wow was held in a large circular tent capable of holding about four hundred riders, which was decorated with the queer hieroglyphic script of the Stoney Indians and surrounded with ropes similarly decorated. The site of the Pow-Wow is an Alpine plateau about seven thousand feet above sea level, wooded with larch but containing a broad open space on which a small rodeo was held for the benefit of the Trail Riders. The Pow-Wow was the culminating point of three official trail rides, one which started from Jasper on July 19th, one from Lake Louise by way of Bow Lake and Molar Pass on July 29th, and one from Banff by way of Jona-

stone Canyon and Baker Creek on July 31st. The aims of the Trail Riders is to encourage travel on horseback through the Canadian Pacific Rockies; to foster the maintenance and improvement of old trails and the building of new trails; to advocate and practice consideration for horses; and to promote the breeding of saddle horses suitable for high altitudes; to foster good fellowship among those who visit and live in these glorious mountains; and to encourage the love of outdoor life.

Harold Eastace Key, conductor of the Mendelssohn Choir of Montreal, wrote a special song entitled, "Ding Dong, Time to Get Up," for the occasion; he was also song leader on the Lake Louise Trail and at the Pow-Wow.

"Swat the fly" with GILLETT'S LYE

A teaspoonful of Gillett's Lye sprinkled in the Garbage Can prevents flies breeding

Use Gillett's Lye for all Cleaning and Disinfecting

Costs little but always effective

Strange, Romantic Love Adventures of the Flapper you know

Joanna

by H. L. GATES

Copyright 1925 by H. L. GATES

Published by arrangement with First National Pictures, Inc.

CHAPTER XI.—Continued.

"Shall we begin with Roddy?" Brandon asked, and they did. Joanna sought him out on the floor as Brandon explained him—drawing for her a curious picture of a wasted—but a picture she classified as of a romantic hater in a colorful domain.

A bachelor lodge at Palm Beach where he was lust to that company of women whose husbands labor at home for the money with which their wives blossom gorgeously and recklessly—beneath the Florida palms, and make their plays at Bailey's, America's great gambling rooms; a wonder of debauches whose names shone golden in the parlors of society, and the amused dabbler among the studio mounds of New York's Greenwich Village; a sportsman in England, where he hunted, occasionally, with the honors of a country lord, and a beautiful patron of all the beauty and the bizzarrie that is France.

"A woman need never fear of being seen with my Roddy in attendance upon her," Brandon added to his general description. "His affairs are so many no one keeps track of them or becomes interested in a new one. He adds just the proper perspective to any young woman's background, for to be admired by Roddy is a cachet of extremely romantic worthiness."

"But his business—doesn't he really do anything?" Joanna wanted to know.

"He's of a family, you know. Inherited money. I believe he would explain that it is the duty of heirs who can to help those of the generation who can't to pay the price of their pleasures. That keeps him moderately fond of youth young youth, such as yours, or seasoned youth, such as Yvonne's."

THIS WOMAN NOW WELL

Her Suffering Relieved and Health Restored by Lydia E. Pinkham's Vegetable Compound

Toronto, Ontario.—"I am certainly very grateful for the benefit I have received from Lydia E. Pinkham's Vegetable Compound, also the Sanative Wash and the Liver Pills. In the early spring I was suffering so much from loss of blood that I thought I would never be any better as doctor's medicine relieved me only for the time being. I saw the Vegetable Compound advertised in the 'Toronto Star,' and I find the Vegetable Compound Tablets the best for me. I have been taking them since Spring, and I intend keeping them by me all the time. After reading your Private Text-Book I saw it was necessary to use Lydia E. Pinkham's Sanative Wash, and I can safely say I feel a different woman. My friends remark how well I look. I am a very busy woman, but I am ready at all times to boost your medicines."

Mrs. CHARLES GIFFES, 945 Landsdowne Avenue, Toronto, Ontario.

You may be having an experience similar to Mrs. Giffes' and will be interested to know what she did. Every sick woman can feel confident that Lydia E. Pinkham's Vegetable Compound will help her, since we are told that it does help 98 out of every 100 women who take it.

Sold by druggists everywhere. C

A Wonderful Camera

More Wonderful in Some Ways Than the Human Body

There is a camera in London which is capable of recording pictures at the rate of 300,000 a minute. Strange that man can make machines more wonderful in some ways than the human body. The human eye, in comparison with the camera, cannot receive more than thirty impressions in a second. The new camera is 150 times as fast. Let a vase be blown up by a charge of powder and this speedy camera will take a picture of the explosion which will show the particles of the vase being blown from the centre.

Shall we not have a camera some day which will detect the madly whirling atoms and electrons? Shall we not have a machine which will show us what the scientists already know—that matter is force?

When we have learned to use atomic energy the steam age will seem as out of date as the stone age.—Grove Patterson in Duluth Herald.

Joanna regarded him with her defenses quivering at her finger tips. "Of course they would—some would," she indignantly agreed. "People are always finding fault if you are not just like they are, or like they think you ought to be. What is one's life for, if not to be enjoyed?"

"And having a good time isn't necessarily being wrong about it, you know! Is it?"

He met her plea for understanding promptly. "I can imagine no better bargain than unfettered conscience allied with an unhampered pursuit of one's own desires, and old-fashioned critics be hanged!"

"Well," Joanna considered, "that sounds as if you mean that I have the right idea about things, so I suppose it's all right. Anyhow I don't see why people can't say their prayers with a smile as well as they can with a frown."

To that sentiment, Brandon proposed, "I suggest another cocktail." He produced Kenilworth's silver flask from under a serviette and filled her glass. She smiled across at him, while she sipped, and felt that she had put up another good battle for the rights of youth.

When Kenilworth and Yvonne were again at the table Kenilworth begged Joanna to tell him "If Brandon wrapped me in scandal and delivered me as a broken idol" while they were dancing.

"That is something I shall have to consider," Joanna returned. "He told me you were not at all dangerous, or, at least he gave me that impression. I shan't be at all afraid of you."

"And that is both a promise and a challenge. I accept both!"

Joanna's pulses raced when Yvonne proposed to her that she come to her own place and make it her home. "For a time, anyway. You will want to be getting away from your old atmosphere, you know, and I shall love to have you with me—as long as you wish."

What Kenilworth had said flashed across her mind, his prediction of just this invitation. She fancied that she caught a flicker of his eyelids when she glanced at him. For nae brief instant the vision of John tramped itself among her thoughts, but it faded quickly when she had shaken her head a little, to drive it away. Any thought of John had become unpleasant. It amused defiance made of her, rebelliousness. Always when he appeared in her mind, she saw herself, at first, going up to him, her face lifted, her lips bared pleadingly, for the greeting that had been so customary between them. This sort of vision hurt, though. The phrase that ran so often across her brain would come back—"Would that fit in, now?" This time it was the thought of John coming to her and finding her with Yvonne. There was something about that which wasn't right. So she gave that little shake of the head and drove John away.

(To be continued)

Ancients Built Largest Statue

No Other Has Equalled the Colossus of Rhodes

The ancients still hold the record in some departments.

For instance, the great pyramids of Egypt have never been equalled either in size or the weight of material used. It has been surmised that the delta of the Nile was so uniformly flat that the ancient Egyptians, seeing mountains in neighboring lands, determined to build structures "mountainous high."

No statue at present standing in any part of the world can compare for sheer size with the Colossus of Rhodes. It was long believed that this mighty statue of brass beset the mouth of the Mediterranean island's harbor, and that ships in full sail passed through its knees, but this is not now thought to be true.

Even Shakespeare says, in "Julius Caesar": "The cloth beset the narrow world like a Colossus." The statue stood 126 feet high, and one of its fingers was larger than a man. It was executed by Charles of Lindus, stood for fifty-six years, and was then thrown down by an earthquake.

Here Centuries Before Columbus

Scientists recently discovered a tangle of knots which, translated, revealed a knowledge of Oelege among America's earliest civilized people, the Incas. The first white civilizations are said to have come to America 2,300 years ago, centuries before Columbus was born.

Wool From Northern B.C.

There was shipped recently from Terrace in the Prince Rupert district half a ton of wool, the first that has gone out. It was from the ranch of William G. Goodwin, of Kitsukallum, consigned to Kamloops.

Interesting Facts In Government "Blue Book"

Official Report Issued Every Year By London Police

Every year, says a writer in a London paper, the police take a census of the number of habitual criminals at large.

The last figures given in a government "Blue Book" just published, show that nearly three thousand persons regularly commit crimes for a living, over five hundred of these being women. There were also 311 houses of receivers of stolen goods "known to the police."

There are any number of interesting facts in the official reports. For instance, many people believe that the death sentence can be passed only in connection with murder. Actually, however, the sentence may be pronounced for treason, piracy, or for setting fire to a government ship or arsenal.

Legal crimes include such things as challenging a person to a duel, or holding a political meeting within a certain distance of the Houses of Parliament.

There are all sorts of acts about the observance of Sunday still in force, though they are seldom or never carried out. Under a very old clause any person "travelling by boat" on a Sunday is liable to punishment, while there is an act just over three hundred years old that forbids anyone to leave his own parish on a Sunday to engage in "sports or pastimes" elsewhere.

Miller's Worm Powders are a prompt relief from the attacks of worms in children. They are powerful in their action and, while leaving nothing to be desired as a worm expellant, have an invigorating effect upon the youthful system, remedying fever, biliousness, loss of appetite, sleeplessness, and other ailments that follow disorders caused by worms in the stomach and bowels.

Wager Remains Unsettled

Prince Bets £5 No One Would Recognize Him On Stroll

The Prince of Wales is looking for a sympathetic arbitrator to settle a bet.

Leaving his apartment at St. James' Palace for an evening out, a friend who accompanied him sympathized with him because he could not go about unrecognized like ordinary people.

"I'll bet you £5 nobody recognizes me between here and Trafalgar Square about five blocks away," Wales replied.

The bet was taken. Wales and his friend walked three blocks without incident. Then a woman stared hard at Wales, and the friend claimed the bet.

"She didn't recognize me, or she would have been too polite to stare," Wales responded—and the bet remains unsettled.

Minard's Liniment for Dandruff

The young wife was busily plucking her needle. "It's too bad," she complained to her husband, "the careless way the tailor sewed this button on. This is the fifth time I've had to put it back for you."

HAD PIMPLES OVER A YEAR

On Arms and Limbs. Lost Rest. Cuticura Healed.

"I was bothered with pimples for over a year which affected my arms and limbs. The pimples were rather large and red and quite hard, and festered and scaled over. They itched and burned causing me to scratch, and I lost rest on account of the irritation."

"A friend recommended Cuticura Soap and Ointment so I sent for a free sample. There was a difference after using it so I purchased more, and after using two boxes of Cuticura Ointment and three cakes of Cuticura Soap I was completely healed." (Signed) Miss Martha Hinsche, Box 13, Fillmore, Sask., Nov. 10, 1925.

Use Cuticura to clear your skin. Sample sent free by Mail. Address: Canadian Agent: "Macdonald, Ltd., Montreal." Price: Soap 25¢, Ointment 25¢ and 50¢. Talcum 25¢. Cuticura Shaving Stick 25¢.

How London Zoo Started

Natural History Enthusiasts Responsible For Present Valuable Collection

The London Zoological Society originally consisted of fifteen natural history enthusiasts, who met at regular intervals to discuss animals.

Eventually they decided to rent a site in Regent's Park, where fish could be reared, waterfowl bred, and a small menagerie of animals kept—the beginning of the Zoo.

Today the collection numbers some thousands of animals, birds and other creatures—and is worth untold wealth. The first animals to be brought from abroad by one of the Zoo's emissaries—who nowadays comb the world for specimens—were those captured in the Falkland Islands by a keeper named Leconte.

When he returned with one seal lion, a wolf, a goose and two gulls, everyone went wild with excitement, and Leconte became the hero of the hour.

The Zoo's first hippopotamus, a species of animal that has always been one of the biggest "draws," arrived in Regent's Park just three-quarters of a century ago.

Music Of the Elements

Orchestral Effect Produced By Wind Under Certain Conditions

We are so accustomed to man-made music that we seldom realize that the elements have ways of producing music of their own. In the Malay States there are fields of bamboo that in certain conditions make a volume of sound that from afar strikes the ear like a huge orchestra of flutes. The effect is caused by a small wind which bores holes in the bamboo stems; the wind, blowing through the holes, produces an astonishing variety of notes that sometimes blend in one great open-air symphony.

Another form of outdoor orchestra is to be found on the Scottish coast, where the sand, in some districts, produces distinct musical notes when walked on or struck by a stick.

Water, in certain circumstances, is capable of yielding extremely pleasing musical effects, a fact realized by the ancient Greeks, who had a number of musical instruments operated solely by water. Certain North American tribes of Indians make music by hitting buffalo hides with water and beating them with sticks.

Little Helps For This Week

When I awake I am still with Thee.—Ps. cxxxix, 13.

Still, still with Thee when purple morning breaketh. When the bird waketh and the shadows flee; Fairer than morning, lovelier than the daylight, Dawns the sweet consciousness, I am with Thee!

Harriet Beecher Stowe.

I would ever awake with God. My first thoughts are for Him, who hath made the night for rest and the day for work, and who hath blessed both. If my heart be early seasoned with His presence, it will savor of Him all the day.

The Terror of Asthma routes like a thief in the night with its dreadful thrumming, robbing its victim of breath. It seems beyond the power of human aid to relieve until one trial is made of that remarkable preparation, Dr. J. D. Kellogg's Asthma Remedy. Then relief comes with a rush. Life becomes worth living, and, if the remedy be used persistently, the disease is put permanently to rout. Take no substitute.

His Majesty's Understudy

King George Is Often Represented By A Deputy

Owing to the number of public and social engagements King George has to keep, it often becomes necessary for His Majesty to be represented by a deputy.

The man who represents the King, be he prince, peer, or commoner, becomes for the moment invested with kingly rank. He must be addressed as "Sir," no one must sit down in his presence, and he takes precedence over all others at whatever function he may attend on behalf of King George.

At all public functions attended by the King, a reception committee must be appointed to receive him, and the same ceremony must be accorded to the King's representative.

When attending any ceremony in London, the King's representative is provided with one of the royal carriages, but no outriders are sent. Nor is he ever accompanied by a military guard, unless he is a member of the royal family.

You'll never acquire popularity by telling your neighbors how to do things.

Woman Runs Paper Mill

Swedish Woman Has Handled Business Successfully For Years

A Swedish woman, who owns and successfully operates a pulp and paper mill in the northern part of Sweden, Fanny Lander Scharvig, was recently a visitor in Winnipeg on her way to Edmonton, where she hopes to persuade one of six sons to return home with her. Mrs. Scharvig was widowed in 1910, and has since headed her husband's business with an annual output of 150,000 tons of paper, which is sold in Sweden and England.

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours' illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevent stomach and bowel troubles, or if trouble comes suddenly as it generally does, the Tablets will bring the baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Not Harmful To Eyes

If you can read, write or do other work without blinking your eyes, there is no harm in going to the movies, specialists in eye diseases say. Tests with 150 persons showed that those who suffered eye fatigue after watching a motion picture film, also became tired when doing other work that affected the vision, so that the movies were not responsible for the trouble.

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Expellant has proved a boon to suffering children everywhere. It seldom fails.

Teacher: "So you admit the unfortunate lad was carried to the pump and there drenched with water? Now, what part did you take in this disgraceful affair?"

Jones (meekly): "The left leg, sir."

and scarified. Make sure that the seed you get is government tested for purity and germination. If your seed has not been hulled and scarified, only about half of it will germinate; so it is important that you get the right kind of seed. Specify the kind you want and ask the dealer if he knows what he is selling you. We have secured excellent results from seeding ten to twelve pounds of hulled and scarified sweet clover seed per acre but for pasture or hay, it is certainly an advantage to seed somewhat thicker, as you will get a much finer quality of hay. Our general rate of sowing is rather liberal—fifteen to twenty pounds—and we get best results from this rate of sowing.

For feeding purposes sweet clover is more valuable than red clover, and almost equal to alfalfa. Sweet clover, if sown early in the spring on good soil, may make a fair cutting of hay the first year. It makes excellent pasture the first year, and, unless pastured very close, is not greatly damaged. Under favorable conditions in some sections two crops of hay are cut the first year. The last cutting should be light so as to leave some winter protection.

The second year the growth starts very early, and if conditions are favorable, is ready to cut for hay earlier than expected. The growth is very rapid, and it soon begins to get stemmy. It should be cut before the stems develop very far, which will be before any bloom appears.

The cutting of the white sweet clover must be high. The new growth does not come from buds on the crown like alfalfa or red

When just beginning to grow sweet clover so closely resembles alfalfa that many will mistake one for the other. They may be distinguished by noticing the edge of the leaves; the sweet clover leaves are much like saw teeth, while the alfalfa is almost smooth; or by the rather bitter taste of the sweet clover as compared to the alfalfa. When older, the sweet clover develops a main stem with many branches, while alfalfa produces many stems from the crowns, with but few branches.

The biennial sweet clover, when sown alone in the spring will make considerable growth—one to three feet—and may be cut for hay. Under favorable conditions, two crops of hay may be cut the first year. It is the nature of this plant to store up in large fleshy roots food which is used the second year in the production of seed. Pasturing heavily or cutting close before it has made its maximum growth may limit the growth and seed production the second year to some extent. In favorable seasons sweet clover makes excellent fall pasture, after the small grain is cut.

Western Canada has very little soil not adapted to sweet clover. It will not grow on sour, acid soils, which are just the opposite of the alkaline, lime soils of Western Canada. It will do especially well on rich, lime soils, with plenty of moisture. But if it can get a start at all on the clay, sandy, alkali or gumbo soils, it will make a comparatively remarkable growth. On shifting, sandy soils, if only a few plants get a foothold, they will protect others, and soon the whole area will be covered. It will push out into the alkali flats further than any other crop, and these soils, after sweet clover has been grown on them a few years, will produce other crops more successfully.

Sweet clover should be sown early in the spring with small grains. We have had excellent success using either oats, wheat, flax or barley. We prefer Marquis wheat, and seed only about three-quarters of the ordinary seeding. Marquis is early and does not shade the ground as much as some other varieties. We use only clover seed which has been hulled

News Notes

School opens on Labor Day, Monday, Sept. 6th.

Mr. and Mrs. T. Ott motored to Calgary last Tuesday for the purpose of securing passports preparatory to leaving for Bellingham, Wash.

The high school staff for the term opening Sept. 6 is composed of J. H. Blackmore, D. H. Lent and G. D. Martin. The school board feels justified in retaining Mr. Blackmore as principal in view of his record last term, when out of 108 units taught by him 101 passed—an average of 95.51%. Mr. Martin has had 15 years experience and has taken advanced work at Queens University. Mr. Lent has taught for ten years in Alberta, possesses inspection qualifications, and is a specialist in English and history. The board feels confident that all grades will make an excellent showing this coming term.

With two lengthy stories in this issue many brief news items were crowded out.

Elsworth Brown, age 50, died last Monday at the Community hospital after a prolonged illness. He is survived by his wife, three children, five brothers, two sisters and parents. Mr. Brown arrived here about 15 years ago from North Dakota, and since that time has become one of the most popular and prosperous farmers in the district. Impressive and well funeral services were held in the United Church with Rev. Wakenshaw in charge. Interment was made under the direction of M. E. Christensen, local undertaker.

clover, but from buds on the stems. If there are no live buds below where it is cut the plant will be killed. Some mowers do not admit of being adjusted as high as they should be. Extensions can be put on the shoes of such mowers to hold the sickle bar four to six inches from the ground, or a harvester or binder may be used. In humid seasons, the hay contains a large percentage of water and is slow in curing. We found it somewhat more difficult to cure than alfalfa.

To be continued

News Notes

C. W. Stone has leased the Raymond Hotel from O. H. Snow, and has purchased the hotel furniture from C. M. McCarthy, and will take possession next Wednesday. The dining room is not included in this lease. Mrs. Stone will manage the hotel.

Mr. and Mrs. Solon Low and children arrived here on Monday from Arrowhead, in the northern part of the province. Mr. Low has accepted a position on the local school staff.

DRESSMAKING

All kinds of plain and fancy sewing done. Ladies' dresses, suits, and coats a specialty. Also children's and babies' clothes. No order too large or too small. Terms moderate.—Miss L. Ward, at the Oliver residence just west of the ball park. s 8t

"Charlie's Aunt" with Sid Chaplin is coming to the Rex the last 4 days next week. It is without doubt the funniest picture ever filmed.

NOTICE—Impounded Aug. 19, one red and white heifer, spotted, 2 or 3 yrs. old, no visible brand. Will be sold Sat. Aug. 28th at 6 p. m., at the Town pound, unless claimed.—Chas. Selman.

Everybody come!
Women's Institute Pantry Sale
in Sample Room
Saturday Afternoon, Aug. 28th.

FOR SALE—21 inch Racine Grain Separator, in Shape for threshing. Apply W. D. Walton, Raymond. s 13

UNITED CHURCH Services—Sunday at 7.30 p. m. Everybody welcome.
